

### A note about Consumers Energy...

Consumers Energy has informed the City that they will be working on gas mains and services in advance of City road construction this summer.

This work is not under the City's contract or scope of work and is conducted by Consumers Energy crews and their contractors. **You pay for their work through your gas utility bill – not your City tax millage.**

Typically, Consumers Energy will begin their work several weeks before the City. However, their work may overlap with ours. As with any Consumers Energy work, they are responsible for their work, including restoration – not the City.

**The City does not control Consumers Energy or their contractors.**

If you have any questions or concerns about Consumers Energy work during any phase of this summer's road construction – Please call them directly at:

**Ernest Martyniuk (248) 433-5868**
