48. Special Approval – Expansion of COSTCO at 30550 Stephenson Hwy

A public hearing was held to hear comments, if any, to permit the continued use of retail sales in an M-1 Light Industrial District for an expansion of the COSTCO store at 30550 Stephenson Highway. Kim Sanford, Real Estate Developer for Costco, was present and stated that the receiving dock will be relocated to provide more interior room to add new merchandise to the store. There being no further comments from the audience, the public hearing was closed.

Motion by Councilmember Scott,
Supported by Councilmember Corbett,

WHEREAS, a Special Approval Board application has been received from Theodore R. Johnson of Costco Wholesale c/o TJ Design Strategies, Ltd, 2311 W. 22nd Street, Ste. 208, Oak Brook, IL, 60523 requesting to use the property at 30550 Stephenson Highway for an expanded use of retail sales in an M-1 Light Industrial District for an existing Costco store; and

WHEREAS, a public hearing was advertised in the Daily Tribune on February 6, 2008 and 72 notices were mailed to property owners within 500 feet of the aforementioned property; and

WHEREAS, a report has been received from the Community Development Department, stating that:

LOCATION: 30550 Stephenson Highway – East side of Stephenson Highway south of 13 Mile Road

REQUEST: Special Approval for proposed building expansion on a previously approved COSTCO facility under Section 10.329(5) of the Zoning Ordinance

EXISTING ZONING: M-1, Light Industrial District

EXISTING USE: Existing COSTCO facility

STAFF ANALYSIS:

1. Special Approval for this facility was granted in 1997 (Case 97-09). The proposed 13,727 square feet addition to the south side of the existing building will result in expanded internal sales area and relocation of the existing truck wells from the southeast to the northwest side of the building.

2. In 2005 Costco sought and received special approval for an expansion of the existing facility that included an entirely different floor plan and necessitated front yard parking along Stephenson Highway. The Planning Commission approved the plans for front yard parking. Costco chose not to proceed with those plans and is now seeking approval for the addition as detailed on the attached plans.

3. The revised parking layout exceeds minimum ordinance requirements and does <u>not</u> include front yard parking. Accordingly, the Planning Commission will not need to approve the parking layout as it is in conformance with the M-1 District standards. The applicant has proposed substantial additional landscaping and berming along the Stephenson frontage to enhance the visual impact from Stephenson Hwy.

4. The proposed service area is enclosed within a new building wall along the west (Stephenson Hwy) front and a partial top wall along the north side. This encloses the truck well area and incorporates it into the building envelop as seen from Stephenson Highway.

5. Hours of Operation: Mon – Fri: 10:00 a.m. to 10:00 p.m.
   Saturday: 9:30 a.m. to 6:00 p.m.
   Sunday: 10:00 a.m. to 5:00 p.m.

6. The Site Plan Review Committee has reviewed the site plan and has no additional comments to address.

NOW, THEREFORE, BE IT RESOLVED, that the Madison Heights City Council, acting as a Special Approval Board in accordance with Section 10.329.5 of the Code of Ordinances, hereby approves use of the property at 30550 Stephenson Highway for an expanded use of retail sales in an M-1 Light Industrial District for an existing Costco store at 30550 Stephenson Highway.

Mr. Zacharsky complimented Community Development Director Schafer, Deputy Community Development Director Williams and particularly Building Inspector Ed Jonas for the outstanding service and the extra help given to them during their building transition.

Motion by Councilmember McGillivray,
Supported by Councilmember Corbett,

WHEREAS, a Special Approval Board application has been received from Steven Singer, property owner and Robert Zacharsky, applicant, requesting to add retail sales and customer service to the use of the property at 32429 Industrial; said property is zoned M-1 Light Industrial, and

WHEREAS, a public hearing was advertised in the Daily Tribune on February 8, 2008 and 56 notices were mailed to property owners within 500 feet of the aforementioned property; and

WHEREAS, a report has been received from the Community Development Department, stating that:

LOCATION: 32429 Industrial

REQUEST: Special Approval for retail sales in the M-1 District under Section 10.329(5) of the Zoning Ordinance.

EXISTING ZONING: M-1, Light Industrial

EXISTING USE: Pool and related supplies warehouse

STAFF ANALYSIS:

1. Special Approval is required for retail sales in the M-1 District. The applicant is seeking approval for retail sales operations for pools, related supplies, spas and billiards tables at this address.

2. Viscount Pools was granted Special Approval by City Council for the adjacent building to the north (32439 Industrial) on October 9, 2006. The applicant is now seeking special approval at 32429 Industrial and is "swapping" buildings with Easom Automation.

3. Parking meets minimum ordinance requirements.

4. Hours of Operation: Mon – Sat: 8:30 am – 5:30 pm

5. The Site Plan Review Committee has reviewed the plan. Should City Council grant special approval, the Committee recommends the following condition: Approval of final merchandise racking plan by Building Official during the certificate of occupancy process.

NOW, THEREFORE, BE IT RESOLVED, that the Madison Heights City Council, acting as a Special Approval Board in accordance with Section 10.329(5) of the Code of Ordinances, hereby approves the use of the property at 32429 Industrial for KB Leisure dba Viscount Pools and Billiards for retail sales in an M-1 Light Industrial building, subject to approval of the final merchandise racking plan by the Community Development Department during the certificate of occupancy process.

The Department may declare fire lanes thereon in accordance with the above criteria.

511.2 Applicability; notification of owners of property whereon lanes established.

This article shall apply to all such existing facilities within the city. The erection and maintenance of said signs shall be the responsibility of the property owner. Any owner who, upon notification that a fire lane has been established on his property and within 30 days thereof, fails to erect uniform fire lane signs shall be in violation of this article and subject to punishment as provided herein. Further, when said signs are not erected within 30 days of notification, the City Council may direct that said signs are to be erected and the cost thereof assessed against the property and collected as prescribed in the Charter for the collection of special assessments. When such fire lanes are adjacent to a parking lot, such fire lanes shall be clearly outlined with curbing, posts or other markings raised above the grade sufficiently so they will not be obscured by snow or other materials.

Exception:

The Fire Chief or his duly authorized representative may grant permission for parking of certain vehicles, objects or trailers in designated fire lanes for limited periods where such parking will not interfere with the usage of the fire lane by emergency vehicles. 101. FY 2008-2009 Budget Review

Mayor Swanson welcomed everyone to the Special Budget Workshop Meeting.

City Manager Austin presented a handout of the slides for the presentation and indicated that the Proposed FY 2008-09 Budget equates to $54.1 million and represents a decrease of $418,000 or 0.8% as compared to the prior year. The budget preparation was again difficult given current and future financial challenges. The presentation will address the financial challenges, the City goals, and the future funding strategies and how they have guided this budget process.

Director of Administrative Services Melissa Marsh continued the presentation and stated that oil prices continue to climb to over $117 per barrel leading to a $54,000 increase in the Budget for gasoline and an 8% reduction in the funding the City receives through the State of Michigan Gas and Weight Taxes due to reduced consumption of gas. To address this challenge and to improve fleet economy, the Police Department and the Motor Pool Division have been looking at the feasibility of moving the patrol car fleet to more economical models. The Motor Pool Division's work plan calls for the City to evaluate the possibility of integrating some hybrid cars into our fleet and the impact

of nitronizing vehicle tires to improve gas mileage. Due to a national economy slow down over the last year, the City will experience cutbacks in federal grants. Over the last five years, annual CDBG funding has been cut from $193,000 in FY 2003-04 to $127,000 for FY 2008-09. As a result in cutbacks, the City has in prior years been forced to shift one part-time Code Enforcement position formerly supported through this grant to the General Fund and as part of the Proposed Budget a portion of funding for the supervisor has been shifted from CDBG to Housing Commission Budget.

City Assessor Dwayne McLachlan discussed the financial challenges the City faces with the narrowing gap between assessed value and taxable value. Based on projections, this gap will drop to 9% in 2009 and disappear by 2011, limiting funding to support City expenditures for the next several years even as individual expenditure items may be subject to increases caused by inflation. High unemployment and credit woes in the banking industry has resulted in annual foreclosures in Madison Heights climbing from 2 in 2000 to 60 in 2003, 108 in 2005, 373 in 2007, and an estimated 430 in 2008. This slowdown in the real estate market has resulted in reduced assessed values and property tax revenues. The City has therefore initiated three new efforts:

First, moving from a two-year to a one-year sales study for the purpose of ensuring assessed values, which will represent current market prices. The Assessing Department estimates that in 2008, this will save Madison Heights taxpayers $250,000;

Second, the Cities of Madison Heights and Hazel Park, our local school districts, businesses and the Madison Heights/Hazel Park Chamber of Commerce joined forces to hold the first real estate Joint Community Open House on April 20th; and

Finally, in an effort to help promote housing opportunities, eliminate vacant homes, combat blight and revitalize the neighborhoods, the City is initiating involvement in the new Federal Department of Housing and Urban Development (HUD) program known as the "Dollar Home Initiative".

Director of Administrative Services Melissa Marsh stated that for over seven years, the City has done its best to deal with the significant reductions in State Shared Revenues. The State of Michigan Senate Fiscal Agency recently issued a report warning of a possible $134 million decline in anticipated revenues in the current State budget year and a

reduction of $250 million in the next budget year. To prepare for the uncertainty of the State's actions regarding State Shared Revenues, the staff has discounted the Governor's Budget Proposal of a 4% increase in Revenue Sharing and programmed a freeze in projected revenues for the new Budget Year

Since October 2007, the Federal Reserve cut federal funds rate 3%, from 5.25% to 2.25%, marking the biggest reduction since 1990. This cut in rates negatively impacts the interest rate the City can earn on invested funds, reducing General Fund interest income by $119,000 or 18%.

On the expenditures side, the City continues efforts to build a more efficient workforce by reducing personnel and saving money by programming a wage freeze as part of the upcoming labor negotiations for the new agreements starting July 1, 2008. The City Council has also analyzed its insurance needs and has decided to accept a higher risk per claim, raising the City's retention level from $150,000 to $250,000 per incident resulting in premium savings of $206,000 or 25% in the coming Budget.

City Manager Austin explained how the City has been able to continue to progress, despite these challenges, by setting goals and adopting a Mission Statement and Goal Plan on November 26, 2007. City Manager Austin reviewed the 2008-09 City Goals and how they were incorporated into this year's Budget:

<u>Public Safety Related Goals</u>

- $16.4 million or 50% of all General Fund expenditures on Police and Fire Department operation.

- $28,000 to support efforts for fire service resource sharing with other communities in Southeast Oakland County. This includes a plan to analyze, design, bid, procure, implement and upgrade the internet-based dispatch alerting system to support coordination on structural fires automatic mutual aid runs and other response efforts.

- Maintain existing ambulance rescue services by adjusting current transportation rates to more fully cover actual cost. This will increase revenues $44,000 annual.

- $20,000 has been allocated to replace and relocate the current outside warning siren with an appropriate backup power supply and long-term maintenance provided by Oakland County.

- Implement improved physical security features at City Hall, funded through existing building accounts.

- $18,000 has been appropriated to develop multi-year plans, estimate costs and explore outside funding to install vertical traffic sign reflectors to enhance vehicle and pedestrian safety.

- Enhance safe ingress and egress to the Sr. Citizens Center, by designing a new drive and required gate/fencing connecting the rear parking lot to SOCRRA drive at the signalized intersection of Dartmouth and John R for $20,000.

Health Related Goals

- Fourth and final year of removal of trees infested by the Emerald Ash Borer that are either dead and diseased from City parks and rights-of-way at a cost of $85,800.

- City-wide Clean Up Day at the DPS will be expanded to include a new special household hazardous waste drop-off option for residents.

- A community wellness oriented 5K Run and 1 mile run/walk, on a self-supporting basis with use of volunteers, at the Nature Center.

- A total of $300,000 has been allocated from the General Fund Designation for Parks Improvements that have been on hold for years and represent top priorities based on the Parks and Recreation Master Plan. The projects are scattered across a number of parks and include:

- Civic Center Park reconstruction of a parking lot ($63,000);

- Rosie's Park bike motor cross track and climbing rock ($40,000);

- Parking lot resurfacing and expansion phase 2 ($57,000);

- Seed money for the Red Oaks Trail ($125,000); and

- Tree replacement at Rosie's Park and Suarez Woods ($15,000).

Quality of Life Related Goals

Community Development Director Jim Schafer discussed the quality of life and resource related initiatives of Downtown Development Authority, citing efforts to correct and prevent stagnation and deterioration within our existing south end business district by:

- New funding for the sign grant project ($20,000);
- A new business uniform address sign project ($10,000);
- A new façade improvement grant program ($20,000);
- Alley improvements ($100,000); and
- A property acquisition program ($50,000.

Resource Management Related Goals:

The FY 2008-09 Budget includes the most aggressive residential improvement program in the City's history ($4.4 million). The major components of this program include reconstruction of new roads ($2.8 million), water main replacement ($538,000), sidewalk replacement and new installation ($320,000), and road repair and maintenance ($693,000).

The program for commercial and industrial roads in need of repair has been modified to allow for development, design, and a mill and asphalt overlay with appropriate joint and base repairs for these high priority road needs. A total of $1.2 million has been budgeted for the City's northeast industrial district including North Avis, East Avis, Edward and Mandoline. These projects also include $288,000 for the installation of new sidewalks, funded through a special assessment district.

City Manager Austin concluded the presentation by reviewing the remaining initiatives and the future funding strategies with an emphasis on building repair needs, which if not addressed, could result in more substantial repair, building system failure and/or increased liability:

- $310,000 is planned for City Hall projects including a new roof, network computer cabling replacement and door replacements.

- $25,000 for the District Court to renovate the existing deteriorating loading ramp

- $100,000 for a multi-year program to install fire protection in all city buildings, and for a water main extension and a fire suppression system at the Senior Citizen Center.

- $320,000 for critical vehicle replacement

  - $160,000 for an ambulance rescue, code enforcement vehicle, parks pick-up truck and two senior citizen transportation vans from "V-2" Vehicle Millage funds.

  - $70,000 to replace one administrative vehicle, a utility maintenance cart, two riding mowers and a special events trailer from the General Fund Designation for Vehicle Replacement.

  - $90,000 for replacement of two patrol vehicles, one undercover vehicle and the purchase of two motorcycles with lease turn-in from Police Drug Forfeiture Funds.

The Budget includes $24.7 million to support our 196 full-time and 194 part-time positions that has been downsized by 53 full-time positions or 22% over the last 15 years. As part of the current Goal Plan, City Council has adopted a plan to survey comparable employers, develop meaningful cost proposals, and successfully negotiate collective bargaining agreements with the City's eight bargaining units when the current bargaining agreements expire on June 30, 2008. To meet the future financial challenges, no general wage increase has been included in the Budget and only those mandatory employee benefits premium increases obligated under existing labor agreements have been programmed.

City Manager Austin further stated that this year's Budget was balanced while maintaining high priority basic services without employee layoffs or significant reductions to department operations. To prepare the City to meet the continuing challenge of constrained resources and unfinanced needs in future budgets, the City will strive for:

1. Diversification of Revenue Sources - The City should attempt to become less reliant on property taxes and state shared revenues.

2. Review Wage and Benefit Level - The majority of the City's General Fund resources are used to support employee wages and benefits. The City should resist proposals to increase the number of employees and search for methods to constrain the increase in

benefit costs. The hiring review and freeze is planned to continue to create vacant positions that could be eliminated in future budgets, avoiding the hardship of layoffs; however, future unfilled vacancies could lead to service reductions.

3. Alternative Service Delivery - The City should continue to review programs to determine options regarding productivity improvements, cost effective alternatives, consolidation, contracting, reduction or elimination.

City Manager Austin thanked and recognized the extra effort and support from the Executive Assistant Marilyn Haley and the Director of Administrative Services Melissa Marsh, the Finance and City Manager's Office staff for their hard work and efforts during this year's Budget process. The City's Department Heads and staff are also to be commended for their team effort in support of this process and their continued commitment to service excellence.

Mayor Swanson and Council reviewed each page of the Line Item Budget and made comments and asked questions, as follows:

Page 18 – Councilman Hartwell questioned what the transfer-in from the Downtown Development Authority was used for. City Manager Austin stated that it partially funds the Economic Development Coordinator and a Code Enforcement Officer.

Page 22 – Councilman McGillivray asked about the Court loading ramp renovation. City Manager Austin stated that it is used for deliveries and has not been renovated since at least the time the Court took over the building from the Police Department. Cathy Sullivan, Court Administrator, stated it is also used for prisoner transfers by the State Police.

Page 23 – Mayor Pro Tem Scott asked if the City Manager's automobile will be used as a trade-in for the new car. Deputy City Manger Myers stated that it will be evaluated as to whether to trade-in, sell or keep it as part of the vehicle pool.

Page 51 – Councilman Hartwell asked why the Library Coffee Concerts are funded under the Recreation Division and not the Library. Library Director Yerman stated that the Library and Recreation Division sponsor the concerts jointly. City Manager Austin stated that all special events are funded under the Recreation's budget.

Councilman McGillivray requested the cost of holding a second Festival in the Park. Deputy City Manager Myers stated that the City currently provides support for numerous outside events such as the Friends of Madison Heights Car Show, the Nature Center Open House, and Pet Extravaganza to be held this September and that the City will soon have to support the Red Oaks soccer fields. City Manager Austin stated that a second festival would cost approximately $8,000 and due to financial constraints and the resulting position reductions, personnel and funding were not available in the Proposed Budget. The Council declined to support increasing the Budget for this second festival. Mr. Austin stated that a list of all activities will be provided to Council.

Page 59 – Mayor Pro Tem Scott requested that the Youth Assistance appropriation not be cut and to remain at the prior amount $14,345 due to a 40% increase in their caseload. Councilman Corbett requested a report on the number of Madison Heights' youth who attend the Boys and Girls Club in Royal Oak and suggested establishing separate funds instead of specific amounts to specific organizations and that it should be administered by staff or a separate group.

Page 72 – Councilman Corbett questioned why reflective signs have not been placed City-wide. City Manager Austin stated that enough money has been budgeted for the whole City in the FY 2008-09 Proposed Budget. Councilman Hartwell asked the durability of the reflective signs. Deputy City Manager Myers stated that the reflective strip last an estimated 10 years and the life span of the metal signs are approximately 40 years.

Page 83 – Councilman McGillivray expressed concern over the purchase of two Police Department motorcycles in the amount of $30,000, given the potential safety hazards and vulnerability of a police officer on a motorcycle versus a patrol car, and that he would like to take them out of the Budget. City Manager Austin stated that the current motorcycle program uses leased vehicles, the cost of which is scheduled to increase, and the budgeted amount is to purchase, not lease, the motorcycles. Police Chief Sagan stated that the Harley Davidson dealers have raised the lease price from $750 to $2,500 per year. He stated that the motorcycles are programmed to be replaced every 7 years. Due to its residual value, the purchase price is recouped in about 5 years. Motorcycles are an important component of the Police Department because they are much more approachable than a police unit. Over the last 8 years, a significant amount of training time and cost has gone into

this program, and in his opinion, the public is as supportive of this program, as is he. Further, he stated that police officers have been trained as skilled riders and know how to handle these motorcycles and that they are an important part of everyday public relations.

Councilman Hartwell questioned the schedule for computer replacement in the Capital Improvement Plan (CIP) for the next 5 years with the largest number of computers to be purchased in FY 2009-10. Information Technology Director Gary Fiscus stated that due to economic times, computers were only replaced as they failed and the schedule reflects a high number of computers that are past due to be replaced. He stated that new technology is being evaluated to determine if servers and terminals can replace some computers.

Councilman McGillivray inquired if the $125,000 for the Red Oaks Trail is for an asphalt surface. City Manager Austin stated that the money is not only for asphalt, but also for embankments and improvements on a portion of the trail. Staff is current working are in negotiations with Oakland County Parks and Recreation to install part of the trail between Dequindre and John R, along the County proposed dog park and water park.

City Manager Austin announced that consideration of the FY 2008-09 Budget will be held at the May 12, 2008 Council Meeting. Questions on the Budget can be directed to the City Manager's Office and copies are available at the offices of the City Manager, City Clerk and Library.

106. SAD 277 – C & I Roads Sidewalk Gap Program, Resolution 3

A public hearing was held to hear comments, if any, on the necessity to repair or construct concrete sidewalks in the rights-of-way of the public streets on East Avis, North Avis, Mandoline and Edward north of Mandoline in the City of Madison Heights. Kevin Walby, owner of KWL Properties, LLC at 555 E. Mandoline questioned the need for sidewalks in an industrial area that does not have much pedestrian traffic, and objects to paying his estimated $8,000 special assessments during these economic times. He further stated he has no objection to the road paving, but objects to sidewalks. City Manager Austin stated that coordination of installing sidewalks with road construction is less expensive than when done separately; that this project will improve pedestrian safety, provide routes to businesses for employees using public transportation on the mile roads and will encourage walking for workers; and that the assessment is in three installments and there is no interest if the assessment is paid in full on the first installment. There being no further comments from the audience, the public hearing was closed.

138. SAD #278 – 2008 Annual Sidewalk Gap & Repair Program, Resolution 3

A short video presentation about the sidewalk replacement program process was played. City Manager Austin stated that the video is available on the website and will be on cable television until August.

A public hearing was held to hear comments, if any, on the necessity to repair or construct concrete sidewalks in the rights-of-way of the public streets in the area bounded by I-75, Twelve Mile Road, Dequindre, and Moulin and Ajax and at several individual parcels in the City of Madison Heights. The following persons spoke regarding their sidewalks:

Gerald Gutowski, 1776 Dulong, has six squares of sidewalk that have been marked for replacement all of which he stated were replaced eight years ago. Mr. Gutowski has concerns with the contractor's warranty and tree root issues. He also stated the he had been told by the Community Development Department that he wasn't able to remove a tree located in the City's rights-of-way. Mr. Schafer advised Mr. Gutowski that tree removal could be completed at the property owner's expense and that the required permit was available at the Department of Public Services. Mr. Schafer noted that the City was paying for two squares at Mr. Gutowski's residence.

City Manager Austin offered comments regarding the removal of trees from the City's rights-of way stating that it is not nor has it ever been the City's practice to remove trees unless diseased or a safety issue. Mr. Austin also noted that the trees in the rights-of-way were not planted by the City, but most likely planted by developers, contractors or prior residents many years ago when the subdivisions were established.

Douglas Larson, 29104 Howard, expressed concerns with watermain and tree roots in the City's right-of-way elevating squares in front of his residence.

Rimonde Jirges Mery, 1849 Elliott, has no issues with the necessity for sidewalk replacement, only concerns with the financial assistance. As she does not qualify for assistance, she stated her concern over making her special assessment payments ($328 over a three-year period). Ms. Mery stated that her fence has been vandalized and she needs the City to protect her property against vandalism because it too costs her money to repair the fence.

Ronald Briskey, 29505 Milton, inquired if the amount quoted in the letter he received was the actual cost to replace the sidewalk or an estimate.

Community Development Director Schafer confirmed that the amount listed in the letter is the maximum he would be assessed. Mr. Briskey inquired about contracting additional work outside the scope of the City's project. Mr. Schafer responded by advising Mr. Briskey that he would need to contact the contractor directly, without the City's involvement, and that Community Development would be glad to provide the name and telephone number of the contractor. In addition, Mr. Briskey stated that he also had concerns with the contractor's care of the lawns and restoration. Mr. Schafer indicated that restoration is included in the contractor's responsibilities and that a punch list is prepared and follow-up through the Community Development Department. Any resident complaints should be directed to Community Development and would be addressed. Mr. Briskey final question regarding payment terms was addressed by City Manager Austin who indicated that payment in full was an option, once the work was completed and the special assessment was billed.

There being no further comments from the audience, the public hearing was closed.

Councilman Corbett asked Mr. Schafer if he would explain the difference in this year's sidewalk program's tree root removal process versus the process in the past. Mr. Schafer and Deputy Community Development Director Williams indicated that the current program is much more aggressive with the removal of roots, 6 inches on either side and below the sidewalk grade, through a grinding process.

Councilman McGillivray asked Mr. Schafer if it was a possibility to extend the contractor's warranty for a longer period of time. Mr. Schafer responded by indicating that could be looked into, but most definitely would affect the price for future contracts.

Councilman Hartwell inquired of Mr. Schafer as to the number of times the City visits a site during the sidewalk replacement process and asked the deadline for residents to express concerns with the Community Development or do the work themselves. Mr. Schafer indicated that the inspectors typically visit four times, and gave a June 15th deadline for residents to do the work themselves.

Supported by Councilmember Corbett,

141. Agreements with Warren and Southfield to use Homeland Security Vehicles

Motion by Councilman Corbett, supported by Councilman McGillivray, to approve by resolution and authorize the Mayor to sign Interlocal Agreements between Madison Heights and the Cities of Southfield and Warren to use Homeland Security Vehicles, subject to a five-year review of the cost of program. Each city recently acquired a Sergeant 4x4 General Purpose Vehicle (GPV) through an Urban Area Security Initiative (UASI) Grant funded through the Office of Homeland Security. The UASI grant was written by these agencies with the forethought that these vehicles would also be made available to other local law enforcement agencies for their emergency response and training use.

City Attorney Sherman asked Chief Sagan to provide comments regarding the City's participation in the Agreements and use of the GPVs. Chief Sagan indicated his support for the agreements and stated that there is also participation from the Cities of Ferndale and Royal Oak SWAT teams.

Councilman Hartwell inquired as to the maintenance costs that extend beyond the original five-year warranty and requested that City Council

have the opportunity to re-evaluate the Agreements after the warranty expires. Chief Sagan indicated that at this time the extended maintenance costs are not available and agreed with Councilman Hartwell.

RESOLUTION

WHEREAS, in order to comply with the provisions of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq,) and Part 31 and 41 of Michigan Act 451 of the Public Acts of 1994, as amended, the City of Madison Heights, as the owner or operator of a municipal separate storm system, is required to obtain a permit or certificate of coverage under a general permit authorizing the discharge of storm water; and,

WHEREAS, on or about November 12, 2007, the Michigan Department of Environmental Quality (MDEQ) issued a draft National Pollutant Discharge Elimination System Phase II Watershed Permit, Permit No. MIG 610000 for public comment; and,

WHEREAS, during the comment period for the General Permit and extension of the public comment by the MDEQ, the City independently and/or through the Oakland County Drain Commissioner and Southeast Michigan Council of Governments ("interested stakeholders") submitted comments identifying areas of concern with the proposed draft General Permit, specifically requesting MDEQ to adopt revised permit language to achieve watershed-wide improvements and greater flexibility to improve water quality and reporting requirements; and,

WHEREAS, the City maintains that MDEQ's issuance of NPDES General Permit No. MIG 610000 and MPDES General Permit MIS 049000 on May 22, 2008 is not supported by competent, material and substantial evidence, is arbitrary and capricious and/or an abuse of unwarranted exercise or discretion, and is contrary to Michigan law as it:

(ii) produce excessive financial burden without demonstrated water quality benefit;
(iii) remove local control and decision-making authority in water resource management;
(iv) disregards fundamental principles of water resource management; and
(v) improperly disregards and/or disrupts existing financial and institutional agreements previously developed and implemented for watershed-based storm water management under regulatory framework approved by the United States District Court, in addition to other consequences inconsistent with proper and lawful storm water management practices.

6.A.2: The designated authority will complete additional authentication to determine whether the attempted transaction was fraudulent or authentic.

6.B: If a transaction is determined to be fraudulent, appropriate actions must be taken immediately. Actions may include:

1. Canceling the transaction;
2. Notifying and cooperating with appropriate law enforcement;
3. Determining the extent of liability of the City; and
4. Notifying the actual customer that fraud has been attempted.

SECTION 7: PERIODIC UPDATES TO PLAN

7.A: At periodic intervals established in the program, or as required, the program will be re-evaluated to determine whether all aspects of the program are up to date and applicable in the current business environment.

7.B: Periodic reviews will include an assessment of which accounts are covered by the program.

7.C: As part of the review, red flags may be revised, replaced or eliminated. Defining new red flags may also be appropriate.

7.D: Actions to take in the event that fraudulent activity is discovered may also require revision to reduce damage to the City and its customers.

SECTION 8: PROGRAM ADMINISTRATION

8.A: Involvement of management

1. The Identity Theft Prevention Program shall not be operated as an extension to existing fraud prevention programs, and its importance warrants the highest level of attention.

3. Employees must receive annual training in all elements of this policy.
4. To ensure maximum effectiveness, employees may continue to receive additional training as changes to the program are made.

8.C: Oversight of service provider arrangements

1. It is the responsibility of the City to ensure that the activities of all service providers are conducted in accordance with reasonable policies and procedures designed to detect, prevent, and mitigate the risk of identity theft.
2. A service provider that maintains its own identity theft prevention program, consistent with the guidance of the red flag rules and validated by appropriate due diligence, may be considered to be meeting these requirements.
3. Any specific requirements should be specifically addressed in the appropriate contract arrangements.

This resolution will take effect immediately upon its passage, the public welfare requiring it.

In addition, he suggested a graduated fine structure be developed and implemented by the Police and Fire Chief through an administrative policy, approved by Council.

(GG) Director of Administrative Services Marsh indicated that this goal supports review of the professional services contracts within the City to determine if the City is receiving the best rates available or if future service(s) should go out for bid.

(DD) Deputy City Myers suggested a policy to review the ways the City could reduce fuel costs.

(EE) Chief Scheid detailed the costs of exploring energy alternatives and technology available versus the long-term paybacks to the City. (AAA) Councilmember Corbett indicated this goal was not intended change the Police Department's traffic enforcement efforts, it was to simply to supplement the Department's current budget up to $2,000 and provide awareness regarding the House Bill on automated red light violator enforcement currently being considered by the Legislature.

(C) Councilmember McGillivray suggested that the City research the use of surrounding educational institutions to provide the technology and manpower for producing this DVD at the Nature Center.

2009-10 Goal Plan
Adopted December 15, 2008

Organizational Mission Statement

The Mission of the City of Madison Heights is to provide high quality services to residents and businesses in the most efficient, effective, and ethical manner possible so as to maintain and enhance, where possible, the public's health, safety and quality of life.

Health Related Goals

A. Analyze projected water and sewer rates, revenues, and operating and capital expenditures over the next 10 years to determine advisability of issuing debt to support future watermain replacements and other capital projects.
B. Investigate historical municipal solid waste, compost and recycling history along with new service demands and anticipated participation rates, and develop new specifications for competitive bidding, or re-negotiation if cost-effective, and award of long-term solid waste collection and disposal contract.

Public Safety Related Goals

C. Review advance life support (ALS) operations, expenditures and revenues to evaluate the continuation of the ALS millage, and if approved by Council, develop ballot proposal language and conduct a comprehensive public information effort.
D. Revise the City's false alarm ordinance to encourage organizations with a high number of false alarms to correct mechanical and operational deficiencies that have caused City resources to be shifted away from true emergencies and genuine needs for assistance.

Quality of Life

E. Implement the new Neighborhood Stabilization Program using federal grants to provide assistance for the acquisition, redevelopment

and/or demolition of foreclosed and abandoned properties in an effort to stabilize neighborhoods with declining housing values.

F. Partner with the Senior Home Assistance Repair Program (SHARP) to assist Madison Heights homeowners over 60 years of age and those physically challenged in an effort to maintain their homes and remain independent by making homes safer and by reducing the stress and confusion involved in making home repairs.

Resource Management Related Goals

G. Explore environmentally-friendly measures to reduce electric and natural gas consumption and improve building energy efficiency by seeking grant funding, conducting feasibility studies and energy audits of the City's facilities.

H. Research methods to reduce vehicle fuel consumption through development of a new vehicle operation policy, an evaluation of alternative engine sizes and types including hybrids, and improved monitoring of fuel consumption.

I. Update the current business licensing process by streamlining the renewal procedure, removing unnecessary requirements and creating more equitable and consistent treatment among the different classes of businesses.

J. Establish an annual review of contractual services, as part of the City Manager's budget preparation, including the background and history of how they are provided and justification for the current work relationships with an effort to reduce costs or forestall cost increases, where applicable, through renegotiation and/or rebidding.

Special Council Meeting
Madison Heights City Council
Madison Heights, Michigan
March 10, 2009

A Special Meeting of the Madison Heights City Council was held on Tuesday, March 10, 2009, at 5:00 p.m. at the Red Oaks Soccer Complex Park Shelter Building, 29601 John R Road, Madison Heights, Michigan.

87. FY 2009-2010 Budget Preview.

Mayor Swanson welcomed everyone to the Special Budget Workshop Meeting.

City Manager Austin and Director of Administrative Services Marsh provided the Council with a presentation overview of the Proposed FY 2009-10 Budget. The City Manager started the meeting by complimenting the work of the Department Heads, and especially the work of Acting Finance Director Marsh, for an excellent effort in creating proposals to address our financial challenge. He also thanked the City Council for their feedback in prioritizing the Gap Reduction Proposals. City Manager Austin noted that there are difficult times ahead, but he felt that the City team has the skills, experience and dedication to continue to work together to develop the best plan for the City to move forward.

City Manager Austin acknowledged that neither he, the Department Heads nor the City Council want to see programs and services reduced or fees increased. Despite our desire, we still have the responsibility to determine the priority needs of the community and to work together to balance those needs against available resources as we build a consensus Budget.

The Proposed Budget preparation process has been altered this year to provide adequate time to consider and implement gap reduction measures. This Budget Preview Workshop is being held six and one-half weeks ahead of the normal Budget Workshop. The Proposed Budget will still be provided to Council as provided by the Charter mandated third Monday in April, which is April 20, 2009 this year.

November's Long-Range Financial Forecast results, which projected a $2.4 million gap between General Fund and Revenues and Expenditures for FY 2009-10 were outlined. Since then, the City staff and Council have worked on delaying or deferring $500,000 in scheduled purchases; formulated a scaled-back Capital Outlay Plan for FY 2008-09; established next year's revenue estimates, based on actual real property values and staff projections of other revenues; calculated personnel costs; generated over 150 Gap Reduction Proposals, which have been reviewed and ranked by Council; refined Gap Reduction estimates based on closer review; and formulated a Proposed Budget for all City funds with baseline expenditures plus proposed Gap Reduction Measures. Since the time of the forecast, staff has been able to reduce the projected gap from $3.4 to $1.9 million.

To solve the projected $1.9 million gap, staff is proposing $413,000 in estimated revenue adjustments and $1.2 million in expenditure reductions leaving a gap of $372,000. Although it is preferable not to use reserves to fund ongoing expenditures, in this way, the use of fund balance will allow the City to avoid layoffs of full-time employees and preserve the City's highest priority services. It is our plan to make use of the pattern established by the Department of Public Services field unit labor settlement, so the City will generate savings to make-up for the use of fund balance in future budget years.

Compared to the FY 2008-09 General Fund Amended Budget, spending is down $1.6 million or 4.8 percent. This reduction is being driven by declines in property tax revenues of $915,000 or 3.9 percent and a decreased use of fund balance of $932,000.

Based on the information provided to Council in February of 2009, the Proposed Budget includes the following Gap Reduction Measures:

Table I Revenues
   a. Base Revenue Adjustments
   b. Policy–Related Revenue Adjustments including the top 5 of 8 items ranked by Council

Table II No or Minor Service Reductions

Table III Policy-Related Service Reductions including the top 27 of 36 as ranked by City Council

A small group of added measures identified by staff since Council's ranking report was provided.

Next, the City Manager provided Council an overview of the Gap Reduction Measures. The Gap Reduction Measures fall into three categories,

including those that are cross cutting measures impacting multiple departments/divisions making up $273,000 or 25 percent of the total; individual departmental service and program reductions making up $705,000 or 63 percent; and, the remainder of the expenditures which total 12 percent involving conservation and efficiency measures appearing to have no significant impact on service.

The impact of the Gap Reduction Measures on the City's workforce was also outlined. Five full-time position reductions including three police officers (two related to the 2007 termination of Officers), a firefighter and an equipment operator. In regards to part-time workforce, Full-Time Equivalent 5.8 of positions were reduced.

Next, the Major and Local Street Funds were reviewed. It was noted that gas and weight tax revenues have declined as gas consumption for Michigan drivers has fallen. In regard to the Major Street Fund, the City Manager noted that $1.46 million Campbell Road rehabilitation project will be funded through the Federal Stimulus Bill. In regard to Local Street Fund, a very aggressive Proposal "R-2" drawdown of reserve funds is scheduled at $3.4 million. A significant problem in this Fund is the non-"R" portion, which is planned to be sustained through a $250,000 transfer from Major Street to Local Street Fund.

The City's Water & Sewer operation has experienced a steep decline in water consumption, with residential usage down 8.0 percent and commercial sales off 14.8 percent over last year. Overall revenues are down $900,000 or 9.7 percent. This decline has had a tremendous impact on the Funds' cash reserves, as they have dropped from $180,000 cash balance on June 30, 2008 to a projected negative balance on June 30, 2009.

On the expenditure side, the Detroit Water and Sewerage Department has announced a proposed increase of 10.7 percent for Madison Heights. In addition, to support the Proposal "R-2" scheduled projects for next year, the Fund will need to provide $583,000 for watermain replacements.

To address these challenges, assuming no reduction in full-time workforce, the City would need to implement both Gap Reduction Revenue Measures plus increase rates 15 – 16 percent.

Two additional avenues are being pursued to address the projected funding shortfall. Staff has scheduled a meeting with the Detroit Water and Sewerage Board to discuss potentially entering into a new long-term agreement for delivery of water to Madison Heights. Other communities who have entered into these agreements have been able to achieve savings

in the first year. Also, as Council is aware, part of the City's 2009 Goal Plan, staff will be researching the advisability of borrowing money to support the watermain replacement programs over the next seven to ten years. The final key piece of information that is still outstanding is the proposed sewerage treatment rate adjustment by the Oakland County Water Resource Commissioner. Staff hopes to have a better projection on these open issues prior to scheduled Budget adoption in early May.

City Council proceeded to review the Line-Item Budget including the proposed Gap Reduction Measures, first for the General Fund followed by the non-General Fund activities.

The City Council made several requests including the direction that staff retain the services of an outside contractor to review our cable room television production equipment for the purpose of providing a recommendation on what would be needed to remedy the problems that have occurred recently with the audio and possibly upgrading the system.

City Council requested that the staff work with the Crime Commission to discuss minute taking options and the scheduling of future meetings.

Mayor Pro Tem Scott requested that staff provide a listing of historical Outside Agency budgets.

Councilman Corbett requested that staff coordinate a meeting of the Library Advisory Board and The Friends of the Madison Heights Library after the conclusion of this year's budget process.

As a result of the Budget Preview, Council gave the following direction of changes for the Proposed Budget:

Additions to the Proposed Budget Preview

ORDINANCE NO. 1060

An Ordinance to amend Ordinance 571, being an Ordinance codifying and adopting a new Code of Ordinances for the City of Madison Heights by amending Chapter 26, Section 7, of the Code of Ordinances, City of Madison Heights, Michigan, to update and modify the emergency snow removal parking requirements so as to: increase safety for snow removal equipment operators, motorists, and pedestrians; improve the efficiency of snow and ice control operations; decrease City liability, and; improve emergency vehicle access.

THE CITY OF MADISON HEIGHTS ORDAINS:

Section 1.

That Chapter 26, Section 7 of the Code of Ordinances, City of Madison Heights, Michigan, is hereby repealed in its entirety and is replaced as follows:

Sec. 26-7. Emergency snow removal.

(a) Purpose and Intent.

(1) Inclement winter weather impedes the movement of vehicular and pedestrian traffic and creates public safety concerns. To address these concerns, the city engages in various efforts to reduce or eliminate the accumulation of snow and ice upon public roadways. The primary method by which the city engages in such efforts is through the use of roadway snow plowing and salting equipment.

(2) In order for the city's snow plowing efforts to be effective, the public roadways must be clear of parked vehicles, which constitute an obstruction of the city's efforts and contribute to the public safety concerns caused by inclement winter weather when such vehicles cause portions of the public roadways to remain unplowed. This article is intended to ensure increased public awareness of the problem and to require motor vehicle owners and operators to remove their vehicles from public roadways when a snow emergency occurs, thereby furthering public safety and welfare, and reducing the undue roadway safety risks caused by the accumulation of snow and ice around parked vehicles.

(b) Definitions. The following definitions shall apply in the interpretation and enforcement of this article:

(1) The Deputy City Manager is the Deputy City Manager for Public Services, or, in his absence, his duly designated and acting representative.

(2) The Chief of Police is the Chief of Police or, in his absence, his duly designated and acting representative.

(3) Street or highway means the entire width between the boundary lines of every way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel. Streets or highways that are not owned, maintained or snow plowed by the city or other governmental entity shall be excluded from this definition.

(4) Snow emergency. A parking prohibition on some or all streets and highways, or parts thereof, declared by the Deputy City Manager upon the occurrence of any one or more of the following conditions:

a. four (4) inches or more of snow accumulation; and
b. National Weather Service forecast predicting a snowfall of four (4) or more inches within a twelve (12) hour period.

(c) Prohibited parking. No person shall park or allow to remain parked any vehicle on any portion of any street or highway within the city during a snow emergency, or park or allow to remain parked any vehicle in violation of any parking restriction instituted as part of a declared snow emergency as provided in this article. The registered owner or lessee of any such vehicle shall be responsible for a municipal civil infraction and the cost of removal.

(d) Notice of snow emergency declaration. The Deputy City Manager shall cause each declaration made by him pursuant to this section to be publicly announced by means of a news media release to local television, radio and newspapers within a normal operating range covering the city. Each declaration may also include other available city media such as message boards, municipal cable television channel, and the city's website.

(e) Termination of prohibition, civil penalty. Once in effect, the prohibition under this section shall remain in effect until terminated by announcement of the Deputy City Manager, in accordance with this section, except in any street area which has become substantially clear of snow and ice from curb to curb for the length of the entire block shall be automatically excluded there from. Any person, partnership, corporation or joint-stock company which violates any provision of this section shall be deemed responsible for a civil infraction for which a civil fine not to exceed $25.00 may be ordered for the first offense and a civil fine in an amount not to exceed $50.00 shall be ordered for a second or subsequent offense. A separate offense shall be deemed committed on each day during or on which a violation occurs or continues. To allow sufficient time for persons to remove their parked cars from the street, the parking prohibitions triggered by the declaration of a snow emergency shall become effective eight (8) hours after the declaration has been announced in accordance with this article.

(f) Enforcement.

(1) Members of the Police Department are hereby authorized to remove or cause the removal and impoundment of any vehicle that is found parked on any street in the city during a snow emergency. Such vehicle may be removed and conveyed by or under the direction of a member of the Police Department by means of towing to a vehicle impound lot. The Chief of Police is authorized to engage the services of the city's primary vehicle towing company to remove vehicles under the direction of a member of the Police Department where the same are found in violation of this article or other traffic ordinances and regulations of the city, except that if such company is not available or unable to tow the vehicle(s), the Chief of Police may utilize any other licensed and reputable towing company to assist with clearing the streets to ensure snow plow accessibility.

(2) Whenever this article is alleged to have been violated, and regardless of whether the offending vehicle is impounded, police officers shall have the authority to issue and serve a municipal civil infraction citation upon the registered owner of a vehicle found parked in violation of this article. Such citation shall be in the form prescribed by state law, and may be either mailed to the registered owner via first class mail, or conspicuously affixed to the offending vehicle. A municipal civil infraction citation may be issued for each 24-hour period during which a vehicle is parked in violation of this article.

(3) The registered owner or lessee of a vehicle is presumed, for purposes of this article, to be responsible for the operation and parking of that vehicle. In any prosecution with regard to a vehicle parked or left in a place or in a condition in violation of any provision of this article, proof that the particular vehicle described in the complaint was parked or left in violation of a provision of this article, together with proof that the defendant named in the complaint was at the time the registered owner or lessee of such vehicle, shall constitute prima facie evidence that the defendant is responsible for violating this article.

(4) This article shall be supplemental to any other provisions of law granting members of the Police Department the authority to impound vehicles. The rules and regulations governing abandoned automobiles and the impoundment of vehicles, adopted by reference in Chapter 20, shall be followed when impounding a vehicle under this article, except that no advance notice prior to impoundment

shall be required other than the public notice specifically required Section 26-7 (c).

(g) Disabled Vehicles. Whenever a vehicle becomes disabled for any reason, whether or not in violation of this article, on any roadway within the city, the person operating such vehicle shall take immediate action to have the vehicle removed from the roadway. No person shall abandon or leave a vehicle on a street or highway, regardless of whether the person indicates that the vehicle is disabled, except for the purpose of securing assistance during the actual time necessary to obtain assistance and return without delay.

(h) Special Parking Permits. A special parking permit may be issued by the Chief of Police for any person, partnership or corporation or joint-stock company without driveways or for hardship cases as determined by the Chief of Police in his sole discretion. Owners of vehicles granted special parking permits will be issued identifying stickers or placards by the Police Department which shall be displayed during the snow emergency in the rear side window on the driver's side of the vehicle.

(i) Relationship to Other Laws. Any provision of this article which becomes effective by declaration of the Deputy City Manager shall, while temporarily in effect, take precedence over other conflicting provisions of law normally in effect, except that it shall not take precedence over provisions of law relating to traffic accidents, emergency travel of authorized emergency vehicles, or emergency traffic directions by a police officer. The City Manager started the meeting by complimenting the work of the Department Heads, and especially the work of Acting Finance Director Marsh, for an excellent effort in creating proposals to address our financial challenge. City Manager Austin thanked the Council for prioritizing the Gap Reduction Proposals used to balance this year's budget.

The presentation illustrated that sources of the City's financial challenges are related to the national and state economic recessions, the decline of the automobile industry, the banking industry credit crisis, increasing unemployment, foreclosures and the impact of these items on property tax and other revenue sources. General Fund Budget revenues, property tax reductions, gap reduction measures, personnel reductions were outlined.

Next, the presentation reviewed the status of Major Street, Local Street, Police Drug Forfeiture and Water and Sewer Funds.

City Manager Austin mentioned that although not included in this year's budget, the City is working to counter increases in water and sewerage rates by pursuing a 30-year agreement with the Detroit Water and

Sewerage Department for the delivery of water to Madison Heights which includes mandatory restrictions on watering of lawns. In addition, as a future funding strategy, Mr. Austin indicated that the City will also continue to strive for diversification of revenue sources, review wage and benefits levels and search for alternative service delivery methods as a means to assist in meeting the financial challenges that lie ahead.

Mayor Swanson inquired if anyone in the audience had questions, finding none; he proceeded to review the 2009-10 Proposed Line-Item Budget document page-by-page. City Manager Austin addressed Council's questions throughout the review process. City Manager Austin responded by stating that the condominium property owners are responsible for the sidewalk's cost. However, the payment method is dependent upon the resident's agreement with the Association as to whether payment is made to the City individually or as a whole.

City Manager Austin stated that SAD #281 Resolution 5, which confirms the property roll for the District, will be on the May 26, 2009 Council Meeting agenda.

Neal Hoffrichter, 276 E. 13 Mile Road, asked for an explanation as to why his property taxes are going up and his assessed value is decreasing; and, why Lamphere District school taxes are higher than those in the Madison District.

City Manager Austin responded that the average Madison Heights homeowner will be receiving a decrease in City taxes of approximately $40, due to changes in the City's millage levies and expenditures, service and program reductions. In response to the Lamphere versus Madison School District's taxes, Mr. Austin suggested that Mr. Hoffrichter contact the Lamphere School District Administration for a detailed explanation.

144. Ordinance 1061 – Regulate Residential and Business False Alarm Systems, Second Reading.

Motion by Councilman Hennigan, seconded by Mayor Pro Tem Scott, to adopt Ordinance 1061, Regulate Residential and Business False Alarm Systems, on the second and final reading as follows:

ORDINANCE NO. 1061

An Ordinance to amend Ordinance 824, being an Ordinance codifying and adopting a new Code of Ordinances for the City of Madison Heights, by amending, Chapter 7, Article XI, Sections 7-194 through 7-210, to establish procedures for remedying false alarms within the city requiring response from emergency personnel; to provide for recovery of emergency response costs when a defective alarm system is not remedied and becomes a public nuisance; and to protect the public health safety and welfare.

THE CITY OF MADISON HEIGHTS ORDAINS:

Section 1.

Chapter 7, Article XI, Sections 7-194 through 7-210 are hereby amended by deleting the sections in their entirety, and inserting the following new sections to stand in their place:

Sec. 7-194. Purpose, Intent and Definitions.

When a fire detection system, burglar alarm, or other alarm device is activated, the City's Fire Department and/or Police Department respond to protect the lives and property of the citizens and businesses of the City. This rapid response requires the Fire Department and/or Police Department to place numerous emergency vehicles on the streets, which inherently increases the dangers to members of the Fire and/or Police Departments, and to the citizens of the City. Although the City supports and encourages the use of alarm systems to signal the presence of a danger or hazard requiring urgent attention or to which police and/or firefighters are expected to respond, malfunctions of such systems result in increased dangers and unnecessary expense.

Therefore, the purpose of this ordinance is to encourage alarm users throughout the City to maintain operational reliability and properly use alarm systems in a manner which will reduce false alarm responses by the Police Department and Fire Department, thereby reducing and preventing the misuse of police and fire resources at taxpayer expense. Communities throughout the nation have found that the use of a regulatory ordinance designed to first encourage remedial measures, with progressively increased penalties imposed for failure to implement such measures, significantly reduces the overall number of false alarms. Therefore, in order to further public safety and welfare, and to reduce the undue burden incurred by taxpayers for false alarm responses, the City Council hereby enacts this ordinance which shall be known as "The City of Madison Heights Alarm Ordinance."

DEFINITIONS.

Alarm System. A detection device or an assembly of equipment and devices arranged to signal the presence of a hazard requiring urgent attention or to which police and/or firefighters are expected or requested to respond. The term includes any system that can electronically cause an expected response by a law enforcement agency or fire/emergency services agency to a premises by means of the activation of an audible signal, visible signal, electronic notification, or video signal, or any combination of these signals.

The term alarm system shall include, but shall not be limited to, the following types of devices: "Automatic holdup alarm," "burglar alarm," "intrusion alarm," "holdup alarm," "panic alarm," "personal emergency response alarm," “medical alarm,” "temperature fire alarm," "manual fire alarm," "fire alarm," "automatic sprinkler," and/or "water flow alarm." Alarm systems designed solely to alert or signal persons within the premises in which the alarm system is located shall not be regulated by this ordinance, unless such alarm systems employ an audible signal emitting sounds, or flashing lights or beacons, or "silent" signals to emergency officials or monitoring agencies, designed to signal persons outside the premises.

Alarm User. The person, partnership, corporation, company, or other entity who requested the installation of the alarm system, or who has either a ownership interest in the premises, a leasehold interest, or who occupies the premises, or who has some dominion and control over the premises, where the alarm system is installed and operating. In the event the premises are owned or occupied by a partnership, corporation, or other entity, each owner, officer, partner, or operator shall be deemed to be an alarm user. For purposes of prosecuting violations of the penal provisions of this ordinance, and for purposes of collecting fees incurred for false alarms, the person or entity whose name appears as being associated with the property protected by the alarm system on the most recent assessment roll approved by the board of review, as updated, and/or whose name appears in the City's business or alarm license records, shall be presumed to be the alarm user.

Cost of response. The fee established by the annual fee resolution adopted by the City Council which is reasonably calculated by the Police or Fire Department and the Finance Department to recover all, or a portion of, the actual cost to the City for response to false alarms and related investigation. The cost of response may include costs for the use of equipment, the expenditure of department resources, the cost of contracted assistance or services, and the wages and benefits for each department employee who responds or assists with the response to the false alarm in accordance with

lawful and established police, fire or 9-1-1 protocol. The fee may be adjusted annually by the City Council, not to exceed the City's actual cost.

False Alarm. The activation of an alarm system causing a sound or visual signal through mechanical failure, faulty equipment, malfunction, improper installations, lack of testing and/or lack of prudent maintenance, or the negligence of an alarm user or of his, her, or its employees, agents, guest, residents, or invitees. False alarms that are intentionally activated shall not constitute a false alarm for purposes of this ordinance, but may be prosecuted as criminal offense. An alarm triggered by an animal shall constitute a false alarm. A false alarm shall be presumed when an alarm is tested without prior notice to the City, and when a Police Department investigation reveals no evidence of criminal activity, or illegal entry or an attempt thereof, or in the case of a false fire alarm, when a Fire Department investigation reveals no fire or potential fire, or need for medical attention, upon the activation of the alarm system, with the following exceptions:

a. Activation by tornadoes, storms, or other violent conditions beyond the control of the alarm user.

b. False alarms activated by disruption or disturbance of private or public utility company facilities.

c. Testing of the alarm system after prior notification has been received by the Police Department and/or Fire Department.

d. Intentional and non-malicious activation of an alarm or emergency response system due to a real or perceived need for fire, police, or medical assistance, regardless of whether fire, police, or medical assistance was actually necessary.

This ordinance and the definition of "false alarm" are intended to facilitate the more efficient use of police and fire resources for true emergencies and for people who genuinely believe they need police or fire assistance. The focus of this ordinance is on mechanical failure, faulty equipment, improper installations, and the negligence of alarm users. The ordinance is not intended to discourage or otherwise inhibit the use of alarms or 9-1-1 systems to seek emergency assistance. Therefore, this ordinance shall always be construed in a manner that serves to prompt residents and businesses to correct mechanical and operational alarm system deficiencies, but which does not discourage residents and businesses from seeking emergency help.

Sec. 7-195. Permit required for Installation, Operation and/or Maintenance.

No person, partnership, corporation, company or other entity shall install, operate or maintain an alarm system in the City of Madison Heights until such person, partnership, corporation, company or other entity has first obtained the required permits from the City for the installation, operation and/or maintenance of an alarm system.

Sec. 7-196. Permit required for Owning, Leasing or Occupying Premises Equipped with Alarm Systems; Fees; Liability.

Notwithstanding the provisions herein, all persons, firms or corporations owning, leasing or occupying premises upon which an alarm system is installed and maintained shall obtain a permit from the City of Madison Heights. The owner, lessee or occupant of the premises shall provide the City with the following information:

1. Address.
2. Name of business/resident.
3. Telephone number at alarm system location.
4. Name and telephone number of at least two (2) persons who can respond to alarms after hours and within thirty (30) minutes of being summoned.
5. Name and telephone number of the alarm company.
6. The type of alarm.

Permit fees under this ordinance shall be established by Resolution of Council.

Alarm users shall be jointly and severally responsible for violations of this ordinance. The payment of false alarm response costs, fines, or fees shall not be construed to conflict, contravene, enlarge, or reduce any civil or criminal liability of the person or entity billed for the response costs, except to the extent that such responsibility arises out of this ordinance.

Sec. 7-197. Audible and/or Visible Alarms.

No owner, lessee or occupant of a premises shall maintain an alarm system which emits an audible signal (bells, horns, sirens, etc.) and/or visual signal flashing lights, etc. for a period of longer than fifteen (15) minutes from the time of the initial signaling of the device. This section shall not apply to fire alarms systems.

Alarm systems equipped with audible and/or visual devices that are not fitted with shutoff devices shall be subject to deactivation by the police or fire department. Additionally, the owner, lessee or occupant shall be subject to a shutoff fee plus any resulting false alarm fee established by a resolution adopted by the City Council.

Sec. 7-198. Violations; Penalties.

(A) The occurrence of a false alarm shall constitute a violation of this ordinance. To ensure that all alarm systems are properly maintained in good operating order and to minimize the cost to the City for false alarms, alarm users shall be held responsible as provided in this section. Notwithstanding any penalties provided for convictions for violation of this ordinance, and notwithstanding the fact that a prosecution for violation of this ordinance has or has not been commenced, alarm users shall pay to the City a fee or fine provided in this section, for each false alarm, and shall also be held responsible as follows:

*** Faulty fire alarm systems may constitute a hazard to occupant safety. Inspections as well as proof of repair or modification may be required as the result of any false fire alarm, as determined by the Fire Chief or his designee.

(B) The City Treasurer shall administer the invoicing for assessment of false alarm fees established by this ordinance. All notices requiring payment of fees shall include the following statement: "A person aggrieved by this false alarm determination may submit a letter of appeal to the City Manager within twenty (20) days of the billing date, for review of the determination or penalty being appealed, as provided in this ordinance of the City Code of Ordinances." The notice shall be mailed to the alarm user at his, her, or its last known address, based upon city tax, business license, or alarm license records, by first class mail following the false alarm occurrence. The notice shall indicate the occurrence of the false alarm and the potential penalties, as set forth in this ordinance, for future false alarm occurrences.

(C) An alarm user who is liable under this ordinance for the payment of the cost of police or fire response shall make payment in full to the City Treasurer within thirty (30) days of the invoice date.

(D) A person or entity liable for the payment of the cost of police response and/or the cost of fire response who fails to make payment in full to the City Treasurer within thirty (30) days of the invoice date shall have their permit revoked, and shall be subject to a misdemeanor violation and for full payment of the cost of the police and/or fire responses, and for an administrative fee established by the annual fee resolution to reimburse the city for a portion of its administrative costs incurred for pursuing and processing the overdue invoice. In the event that the alarm user appeals pursuant to the appeal provisions of this ordinance any such payment shall be due to the City Treasurer within ten (10) days of the date of the appeal decision.

(E) When payment of the City Treasurer's invoice is not made within thirty (30) days the City shall have the following recourse:

(1) The city may commence a civil action against a person who is liable for the payment of the cost of police response and/or the cost of fire response and who fails to make payment in full to the City Treasurer as required by this ordinance. The city shall be entitled to recover the cost of the response and any additional fees, statutory interest, court costs, and reasonable attorney fees incurred for pursuing the civil action.

(2) Any invoice, including any additional fees, which remains unpaid for ninety (90) days from the invoice date, and which is not being reviewed pursuant to the appeal provisions of this ordinance, shall constitute a lien against the against the premises to which the Police Department and/or Fire Department responded. All unpaid fees shall be entered as a lien on the next tax roll.

Exception. When the premises to which the Police or Fire Department responded are not owned by the alarm user responsible for the alarm system which generated a false alarm (i.e., leaseholders), the invoice shall not constitute a lien against the premises, nor shall it be entered upon the tax roll. Instead, the individual or entity shall be cited for a misdemeanor as set for in paragraph (D). The individual(s), or the owner(s) and operator(s) of entities, who fails to respond to a misdemeanor citation shall be ordered to show cause why he/she/they should not be held in contempt of court for failure to respond or otherwise appear for court.

(3) The alarm user may be cited for a misdemeanor violation pursuant to paragraph (D) of this section.

(F) The occurrence of six (6) or more false alarms requiring a police or fire response within a twelve (12) month period is deemed to be a public nuisance. After the occurrence of a sixth such false alarm within a twelve (12) month period, the City Attorney is authorized to seek abatement of the nuisance in conjunction with a misdemeanor prosecution in the district court for violation this ordinance. In the event that the district court action does not result in an order requiring abatement of the nuisance, the City Council may authorize the City Attorney to initiate civil proceedings in the Oakland County Circuit Court for court-ordered abatement of the nuisance and recovery of the expenses, statutory interest, court costs, and reasonable attorney fees incurred for pursuing the civil action.

Sec. 7-199. Appeal.

(A) Alarm users or persons otherwise aggrieved by receipt of a warning letter for the occurrence of a false alarm, or by a false alarm determination that results in the imposition of a fee for the cost of a police response and/or fire response may submit a letter of appeal to the City Manager for review of the determination of a false alarm occurrence. Such appeal letters must be submitted within twenty (20) days of the date of the warning letter or fee invoice. Persons or entities who are charged with a misdemeanor, may not avail themselves of this appeal provision, but may instead defend against the charge in the district court if desired. The fees prescribed by the City Council may not be appealed or modified by appeal; only the actual determination of a false alarm occurrence may be appealed pursuant to this ordinance. The following appeal process shall be afforded upon receipt of an appeal letter:

(1) Upon receipt of an appeal letter, the City Manager shall forward a copy of the letter, and any supporting documentation submitted, to the Police Chief and the Fire Chief for review.

(2) The Police Chief and Fire Chief shall independently review the letter and, within thirty (30) days, advise the City Manager in writing whether, after reasonable investigation, the appeal should be granted. In order to recommend that an appeal be granted, the independent review must result in the conclusion that the original false alarm determination was clearly erroneous. To reach such a conclusion, irrefutable evidence must support the finding that the occurrence did not fit the definition of "false alarm" set forth in this ordinance.

(3) In the event that the Police Chief and the Fire Chief both agree that the appeal has no merit, or that the appeal should be granted, such unanimous decision shall be final. In the event that the Police Chief and Fire Chief disagree about the merit of the appeal, and thereby render opposing recommendations, the City Manager shall decide the matter based upon his or her review of the conclusions of the Police Chief and Fire Chief, subject to the standards set forth in subparagraph (2). The City Manager's decision shall be rendered in writing in no later than 60 days from the date the appeal was received by the City, unless the City Manager issues a written notice that the review is subject to extraordinary circumstances that require up to an additional thirty (30) days in order to complete the review. The City Manager's decision shall be final, and if fees must be paid by the alarm user pursuant to this ordinance, such fees shall be paid within ten (10)

days of the date the City Manager forwards the final decision to the appellant via first class mail or personal service.

(4) If an appeal is granted, the result shall be that the determination of a false alarm shall be overturned, and the alarm occurrence shall not be counted with future false alarm occurrences for purposes of the progressive penalties in this ordinance. If the appeal is denied, the result shall be that the determination of a false alarm shall stand, and the false alarm occurrence may be counted with future false alarm occurrences for purposes of the progressive penalties in this ordinance.

(5) Previous false alarm determinations may not be appealed after a subsequent false alarm occurrence is determined to have occurred by the Police or Fire Department.

Sec. 7-200. Misrepresentation by Alarm Contractor.

Any misrepresentation by an alarm contractor or any person, partnership, corporation, company or other entity in the business of providing for the installation, operation or maintenance of alarm systems or their agents or employees as to the repair services rendered to an alarm system shall be a misdemeanor.

Sec. 7-201. Separate Systems Required for Separate Entrances.

Whenever a single building contains more than one (1) occupant, and each such occupant has a separate entrance, such occupants shall be required to have separate alarm systems for each business located in such building. Whenever a multiple-housing residential structure shall have separate entrances for each living quarter, each separate entrance to the living quarter shall contain separate alarm systems. This section shall not apply to fire alarm systems.

Sec. 7-202. Test of the System; Notification to Police Department Required; Violation.

It shall be the obligation of any person, firm or corporation owning, leasing or occupying the premises desiring to test an alarm system to notify, in advance of such test, the dispatcher in the communication section of the Police (not Fire) Department if a fire alarm, medical emergency alarm or any other type of alarm system is being tested. Failure to take the above action shall be determined to be a false alarm.

Sec. 7-203. Rules and Regulations.

The City of Madison Heights Police Department and Fire Department may adopt, subject to the Council's approval, such rules and regulations as may be necessary to implement the purposes of this ordinance.

Sec. 7-204. Compliance with Other Ordinance Provisions.

No provision of this Ordinance excuses or excepts any person, partnership, corporation, company or other entity from compliance with any other provisions of the Code of the City of Madison Heights relating to alarm systems.

Sec. 7-205. Penalties.

Any violation of this ordinance shall be a misdemeanor punishable by a fine of not less than $100.00, nor more than $500.00, and/or ninety (90) days in jail. Each day a violation continues shall be deemed a separate offense.

Sec. 7-206. Installation, Operation and/or Maintenance of System without Permit; Defective Alarms; Inspection.

(A) No person, firm or corporation shall install, operate and/or maintain an alarm system within the City of Madison Heights without a permit or after such permit has been revoked or without having obtained a new permit after said revocation.

(B) Defective System: An alarm system signaling more than five (5) false alarms within a twelve (12) month period of time shall be inspected and modified to be more false alarm resistant. Upon written notice, the owner or alarm user of the building or residence shall have the alarm system inspected and modified, at the owner or user's expense, by a licensed alarm system contractor within fourteen (14) days of the date of the notice, and shall forward to the Police Department and/or Fire Department the contractor's report of the probable cause of the false alarms and the measures instituted to eliminate same.

Motion by Mayor Pro Tem Scott,
Seconded Councilman Hennigan,

WHEREAS, a Special Approval Board application has been received from Johnny John, the applicant and owner, requesting special approval at 26085

John R for outdoor seating at an existing restaurant, said property is zoned B-3 General Business, and

WHEREAS, a public hearing was advertised in the Daily Tribune on May 21, 2009 and 208 notices were mailed to property owners within 500 feet of the aforementioned property; and

WHEREAS, a report has been received from the Community Development Department, stating that

1. Special Approval is required for restaurants in the B-3 District. This location was originally granted special approval by City Council in 1986 for a restaurant (indoor seating) and again in 1995 for an expansion of the existing restaurant with indoor seating, subject to a parking variance being granted. The Zoning Board of Appeals granted the required parking variance at the time (27 spaces) and the applicant has operated the facility since that time. The applicant proposes to provide outdoor seating area for 20 seats, with no net gain in seating from the current 97. Applicant proposes to accomplish this by adjusting the internal seating arrangement seasonally, so that the seating remains at the current 97. The proposed outdoor seating is in the area immediately in front of the building and will be surrounded by a 48" high decorative fence. There will be no access to the outdoor seating area other than from the interior of the building.

2. The proposed site plan does not meet minimum parking requirements. A parking variance of 39 spaces is required from the ZBA, should City Council grant special approval. (Note: The parking standards have changed since this facility was originally granted special approval in 1986 and as expanded in 1995. Previous standard was based on size (gross floor area) of the restaurant use – not the 60 seats at the time of original approval or seating expansion. Current parking standard is based on seating and number of employees. Applicant proposes to keep seating at current 97 spaces.)

3. Proposed Hours of Operation:

Monday through Thursday:	7:00 a.m. – 10:00 p.m.
Friday – Saturday:	7:00 a.m. – 11:00 p.m.
Sunday:	7:00 a.m. – 8:30 p.m.

4. The Site Plan Review Committee has reviewed the site plan. All Committee design comments have been addressed.

NOW, THEREFORE, BE IT RESOLVED, that the Madison Heights City Council, acting as a Special Approval Board in accordance with Section 10.201.1 of the Code of Ordinances, hereby approves the application for outdoor seating at an existing restaurant, JJ's Grille, located at 26085 John R, subject to the Zoning Board of Appeals granting the necessary parking variance.

ORDINANCE NO. 1067

An ordinance to amend Ordinance 571, being an ordinance codifying and adopting a new Code of Ordinances for the City of Madison Heights, by amending Chapter 6, Article VII, Sections 6-150 through 6-177; of the Madison Heights Municipal Code to establish measures and safeguards to provide for the public health, safety and welfare by providing for the inspection and licensing of rental property.

Section 1. Sections 6-150 through 6-177 are hereby amended by deleting the existing sections in their entirety, and inserting the following new sections to stand in their place:

DIVISION 2. LANDLORD LICENSES

Sec. 6-150. Definitions.

The following words and phrases when used in this chapter are defined as follows:

Landlord means the owner, lessor, or sublessor of a rental unit, or the property which it is a part of and, in addition, means a person authorized to exercise any aspect of the management of the premises, whether for any form of compensation or not, including a person who, directly or indirectly, acts as a rental agent, receives rent, other than as a bona fide purchaser, and who has no obligation to deliver the receipts to another person.

Owner is any person, agent, firm or corporation having a legal or equitable interest in the premises.

Rental unit means any non-owner occupied structure, or part of a structure, used as a home or residence by a person or household unit, or any grounds, or other facilities or area promised for the use of a residential tenant, whether for any form of compensation or not, including without limitation, apartment units, modular homes and one and two-family dwellings. A rental unit that is rented or leased with an option to purchase is considered a rental agreement until the lessee fully exercises the option to purchase as evidenced by a recorded deed or land contract.

Responsible local agent: The responsible local agent shall be the owner, or a representative of a corporation, partnership, firm, joint venture, trust, association, organization, or other entity having a legal or equitable interest in the property. All official notices may be issued to the responsible local agent, and any notice so issued shall be deemed to have been issued upon the owner of record. The responsible local agent shall be responsible for operating the registered rental unit and shall also be responsible for providing access to such premises for any inspection necessary to insure compliance with the terms of this article.

Sec. 6-151. License required.

No person shall rent, lease, offer for rent or lease, or allow the occupancy any rental unit, whether for compensation or not, without a landlord license from the city. Landlord licenses are not transferable between landlords or rental units. A separate license is required for each dwelling unit in a rental property. A landlord shall be licensed with the city to be entitled to collect rent or to evict

tenants and occupants residing or located on the premises. Sale of the subject property results in immediate termination of any license.

Sec. 6-152. Application; fee; license term.

The fees and the term of the license shall be established by resolution of City Council. Every landlord seeking a license under this division shall make an application to be accompanied by the required fee payable to the city. A registration fee, once tendered, may not be transferred. If the license is cancelled a refund of any unused full year payments may be requested. Such application shall contain the full name, business address, residence address, phone number, date of birth and drivers license or state identification card number of the applicant and if known, the name of the tenant occupying the property.

Application for a landlord license is an admission of fact by the applicant that the applicant is conducting a rental dwelling operation as defined by this article. It shall be the duty of all landlords to apply for the landlord license, and license renewals, as required by this article and obtain all required inspections, repairs, and approvals prior to the occupancy or renewal date.

Sec. 6-153. Licenses; Issuance, revocation, appeal.

(A) The building official shall issue a license under this division if;

(1) The applicant's property is not in violation of any ordinance of the city.
(2) All required inspections of the subject property have been completed and approved.
(3) Application and inspection fees are paid.

    (b) Any water bills outstanding;
    (c) All charges against the property for mowing, cleanup, weed or debris removal, or fines, penalties, or debts of any sort arising from provisions of the property maintenance code, including any blight provisions.

(B) The building official is hereby empowered to revoke or suspend a license issued under this division if it is discovered that the applicant has either:

(1) Misrepresented himself or herself or the ownership or condition of the property or;

(2) His or her property is, or becomes, violative of any of the ordinances of the city.

Sec. 6-154. Inspections.

The building official, or his designee, shall determine the number and type of inspections required to obtain a license and is hereby authorized to make inspections of premises licensed under this division:

(1) Upon application and before issuance of an initial license;
(2) Upon application and before issuance of a renewal license;
(3) Upon receipt of a tenant complaint or at any other time deemed necessary by the building official.

An applicant for a license under this division shall consent to such inspections to determine the condition of the apartment building, multiple unit, multiple dwelling, dwelling or dwelling units within the city. For the purpose of making such inspections, the building official or his or her authorized representative is hereby authorized, upon seven days notice, to enter and inspect at all reasonable times all apartment buildings, multiple dwellings, and rental dwelling units. The landlord, tenant or person in charge of an apartment building, multiple dwelling, or rental dwelling unit shall give the building official or his or her designee free access to the premises.

Sec. 6-155. Designation of responsible local agent required.

The owner of any rental dwelling or rental dwelling unit shall designate a person as the responsible local agent who shall be responsible for operating the rental dwelling or rental unit and who shall provide access to the rental dwelling or unit for inspection by the code official for compliance with the applicable ordinance requirements. The responsible local agent shall be a Michigan resident and reside within a one hundred-mile (100) radius of the City of Madison Heights.

Sec. 6-156. Proof of license.

It shall be the duty of each landlord to provide each tenant with a copy of the current landlord license and subsequent renewals. Landlords of multi-family buildings may elect to display a copy of the current license(s) affixed to an interior wall either adjacent to the primary entrance door to the multi-family building, or in an on-premise rental office.

Sec. 6-157. Transfer of ownership; licenses not transferable.

Upon a sale of an occupied rental unit, the new owner shall apply for a license prior to transfer of ownership.

Secs. 6-158 through 6-177. Reserved.

(6) Any substance which is sufficient to cause the POTW's effluent or any other product of the POTW, such as residue, sludge, or scum to be unsuitable for reclamation processing where the POTW is pursuing a reuse and reclamation program. In no case shall a substance discharged to the POTW cause the POTW to be in noncompliance with sludge use or disposal criteria guidelines or regulations developed under 33 U.S.C. § 1345, with any criteria, guidelines, or developed and promulgated regulations affecting sludge use or disposal developed pursuant to the Solid Waste Disposal Act, the Federal Clean Air Act, the Federal Toxic Substances Control Act, or with State criteria applicable to the sludge management method being used; or

(7) Any substance which will cause the POTW to violate either the Consent Judgment in U.S. EPA v. City of Detroit et al., Federal District Court for the Eastern District of Michigan Case No. 77-1100, or the City of Detroit's National Pollutant Discharge Elimination System permit; or

(8) Any discharge having a color uncharacteristic of the wastewater being discharged; or

All limitations are based on samples collected over an operating period representative of an industrial user's discharge, and in accordance with 40 C.F.R. part 136.

(a) The limitation for Total PCB is Non-detect. Total PCB shall not be discharged at detectable levels, based upon U.S. EPA Method 608, and the quantification level shall not exceed 0.2 ugm/l, unless a higher level is appropriate because of demonstrated sample matrix interference. Where one (1) or more samples indicate detectable levels of Total PCB, the user shall be required to demonstrate compliance. For purposes of this section, this demonstration may be made using analytical data showing that the Total PCB concentration is below the detection level, or submission of a BMP in accordance with Section 29-113.5(d).

(b) The limitation of Mercury (Hg) is Non-detect. Mercury (Hg) shall not be discharged at detectable levels, based upon U.S. EPA Method 245.1, and the quantification level shall not exceed 0.2 ugm/1, unless a higher level is appropriate because of demonstrated sample matrix interference. Where one (1) or more samples indicate detectable levels of Mercury, the user shall be required to demonstrate compliance. For the purposes of this section, this demonstration may be made using analytical data showing that the mercury concentration is below the detection level, or submission of a BMP in accordance with 29-113.5 (d).

All limitations are based on samples collected over an operating period representative of an industrial user's discharge, and in accordance 40 CFR Part 136.

(3) Compliance Period. Within thirty (30) days of the effective date of this ordinance, the Department shall notify all industrial user's operating under an effective wastewater discharge permit of the requirement to submit a compliance report within one hundred eighty (180) days after the effective date of this ordinance. The Compliance Report shall demonstrate the user's compliance or non-compliance with these limitations, and, in the event of non-compliance, include the submission of a plan and schedule for achieving compliance with the stated limitation. In no event shall a compliance schedule exceed (18) months from the effective date of this ordinance. An Industrial User who does not demonstrate compliance may petition the Department for a second extension as part of an Administrative Consent Order. The Department shall include appropriate monitoring, reporting, and penalties into an Administrative Consent Order that relates to a second extension, and shall enter into such an agreement only upon a good-faith

showing by the industrial user of the actions taken to achieve compliance with this provision.

(c) National categorical pretreatment standards. All users shall comply with the applicable national categorical pretreatment standards and requirements promulgated pursuant to the act as set forth in 40 C.F.R. Subchapter N, Effluent Guidelines and Standards, which are hereby incorporated by reference and with all other applicable standards and requirements, provided, however, that where a more stringent standard or requirement is applicable pursuant to State law or regulation, or to this article, then the more stringent standard or requirement shall be controlling. Affected dischargers shall comply with applicable reporting requirements under 40 C.F.R. part 403 and as established by the Department. The National Categorical Pretreatment Standards which have been promulgated as of the effective date of this article are delineated in Appendix A of this article.

(1) Intake water adjustment. Industrial users seeking adjustment of national categorical pretreatment standards to reflect the presence of pollutants in their intake water must comply with the requirements of 40 C.F.R. § 403.15. Upon notification of approval by the Department, the adjustment shall be applied by modifying the permit accordingly. Intake water adjustments are not effective until incorporated into an industrial user's permit.

(2) Modification of national categorical pretreatment standards. The Department may apply to the U.S. Environmental Protection Agency, or to the Michigan Department of Environmental Quality, whichever is appropriate, for authorization to grant removal credits in accordance with the requirements and procedures in 40 C.F.R. § 403.7. Such authorization may be granted only when the POTW treatment plant can achieve consistent removal for each pollutant for which a removal credit is being sought, provided, that any limitation of such pollutant(s) in the NPDES permit neither are being exceeded nor pose the prospect of being exceeded as a result of the removal credit being granted. Where such authorization is given to the Department, any industrial user desiring to obtain such credit shall make an application to the Department, consistent with the provisions of 40 C.F.R. § 403.7 and of this article. Any credits which may be granted under this section may be subject to modification or revocation as specified in 40 C.F.R. § 403.7, or as determined by the Department. A requisite to the granting of any removal credit may be that the industrial user pay a surcharge based upon the amounts of such pollutants removed by the POTW, such surcharge being based upon fees or rates

which the Board may establish and, when appropriate, revise from time to time. Permits shall reflect, or be modified to reflect, any credit granted pursuant to this section.

(3) New sources. Industrial users who meet the new sources criteria shall install, maintain in operating condition, and "start-up" all pollution control equipment required to meet applicable pretreatment standards before beginning to discharge. Within the shortest feasible time and not to exceed ninety (90) days, new sources must meet all applicable pretreatment standards.

(4) Concentration and mass limits. When limits in a categorical pretreatment standard are expressed only in terms of mass of pollutant per unit of production, the Department may convert the limits to equivalent limitations expressed either as mass of pollutant discharged per day or effluent concentration for purposes of calculating effluent limitations applicable to individual industrial users. Equivalent limitations shall be calculated in accordance with Sections 40 C.F.R. § 403.6(c)(3) and/or 40 C.F.R. § 403.6(c)(4) and shall be deemed pretreatment standards for the purposes of 33 U.S.C. § 1317(d) and of this article. Industrial users will be required to comply with the equivalent limitations in lieu of the promulgated categorical standards from which the equivalent limitations were derived.

(5) Reporting requirements for industrial users upon effective date of categorical pretreatment standards-baseline report. Within one hundred eighty (180) days after the effective date of a categorical pretreatment standard, or one hundred eighty (180) days after the final administrative decision made upon a category determination submission under Section 40 C.F.R. § 403.6(a)(4), whichever is later, existing industrial users subject to such categorical pretreatment standards and currently discharging into or scheduled to discharge into the Detroit POTW shall submit to the Department a report containing the information listed in 40 C.F.R. § 403.12(b))(1-7). Where reports containing this information have already been submitted to the Director or regional administrator in compliance with the requirement of 40 C.F.R. § 128.140(b), the industrial user will not be required to resubmit this information. At least ninety (90) days before commencement of any discharge, each new source and any existing sources that become industrial users after the promulgation of an applicable categorical pretreatment standard shall submit to the Department a report which contains the information listed in 40 C.F.R. § 403.12(b)(1-5). In such report, new sources shall include information concerning the method of

pretreatment the source intends to use to meet applicable pretreatment standards. New sources shall provide estimates of the information requested in 40 C.F.R. § 403.12(b,)(4) and (5).

(d) Dilution prohibited. Except where expressly authorized to do so by an applicable pretreatment standard or requirement, no user shall increase the use of process water, or in any way dilute or attempt to dilute a discharge as a partial or complete substitute for adequate treatment to achieve compliance with the limitations contained in the national categorical pretreatment standards, or in any other pollutant specific limitation or requirement imposed by the City of Madison Heights, the City of Detroit or by the State of Michigan.

(e) Hauled in wastewater. Any waste material or wastewater which is hauled into or within the service region for discharge to the POTW is subject to the requirements of this article including, but not limited to, permits, inspection, monitoring and enforcement. Unloading liquid or solid waste from hauling vehicles, directly or indirectly, into the POTW, with or without the benefit of pretreatment, is prohibited unless the person proposing to unload such waste has applied for and received a permit from the Department for unloading such waste in accordance with the Board's rules pertaining thereto. The discharger shall be subject to applicable terms and conditions, surcharges, fees or rates as established by the Board. Hauled in wastewater shall only be discharged at points designated by the POTW after authorization or approval issued pursuant to the general permit requirements specified in section 29-113 of this Code. The Department may establish specific limitations for sludge from municipally owned or operated POTW treatment plants which are different than the specific limitations in this article.

(f) Centralized waste treatment. It is unlawful for a centralized waste treatment (CWT) facility to discharge any industrial waste or wastewater into the POTW without a wastewater discharge permit from the Department. Any authorization granted, or permit issued, by the Department to a Centralized Waste Treatment (CWT) facility shall specify the type of wastewater for which treatment is provided, and discharge approval is sought, from the POTW. Unless such industrial waste or wastewater is determined by the Department to require further authorization, a centralized waste treatment (CWT) facility that has submitted an application to, and received previous approval from, the Department to discharge wastewater is not required to obtain further authorization from the Department before discharging such wastewater.

An industrial user, that provides centralized waste treatment services and files an application for the treatment and discharge of such types of

wastewater to the POTW, shall provide the following minimum information in support thereof:

(1) The general nature, source and process(es) generating the type of wastewater. Any wastewater, which is generated from those processes and is subject to National Categorical Pretreatment Standards as delineated in Appendix A of this article, shall be so designated;

(2) The identity of the toxic pollutants known or suspected to be present in the wastewater;

(3) At least one (1) sample report showing the results of an analysis for the EPA priority pollutants for each type of wastewater for which application is made in Subsection (f)(1) of this section;

(4) A statement, that is certified by a professional engineer, which addresses the treatability and compatibility of the wastewater, received or collected by the facility's treatment process(es);

(5) The identity of the materials and/or pollutants whose transport or treatment are regulated by the EPA, by the State, or by any other governmental agency. Upon request, the Centralized Waste Treatment (CWT) facility shall provide a copy of its permit and/or license to the Department; and

(6) Other information requested by the Department including, but not limited to, information required by section 29-113(c)(1) through (18) of this Code, or by rules adopted by the Board.

The discharge from a centralized waste treatment (CWT) facility will be deemed approved for those specific types of wastewater delineated in a permit and, upon issuance of such permit in accordance with the procedures contained in section 29-113 of this Code, will be deemed approved for discharge into the POTW. The Centralized Waste Treatment (CWT) facility shall comply with all applicable provisions contained in section 29-113 of this Code regarding permits. In furtherance of its obligations as control authority, the Department may include in the permit a requirement to report at selected intervals the information mandated in Subsections (1) through (6) of this section. All users granted a permit under this section shall maintain records which, at a minimum, identify the source, volume, character, and constituents of the wastewater accepted for treatment and disposal. These records may be reviewed at any time by the Department.

(g) Groundwater discharges. Unless authorization has been granted by the Department, the discharge of any groundwater into the POTW is prohibited. The Department may authorize the discharge of groundwater resulting from maintenance and related activities of gas, steam, or electrical utilities through the use of general permits. Subject to appropriate reporting requirements, the general permit shall authorize discharge in accordance with the terms of the permit. Utilities shall comply with this provision within one hundred eighty (180) days after its enactment. If a person, who proposes to discharge groundwater resulting from purge, response activity, or UST projects, has applied for and received a permit from the Department, the Department may authorize the discharge of such wastewater. Permits shall be issued in accordance with the procedures contained in section 29-113 of this Code, or in accordance with any rules adopted by the board.

(h) City of Madison Heights right of revision. The City of Detroit and the City of Madison Heights reserve the right to establish rules or regulations adopted by the Board, additional or more stringent limitations or requirements on discharges to the POTW. These rules and regulations shall be adopted in accordance with the rule-making procedures in Section 2-111 of the 1997 Detroit City Charter, if any. Ninety (90) days after adoption by the Board, industrial users shall comply with such rules and regulations.

(i) Accidental discharges.

(1) Each industrial user, which does not currently have an approved spill prevention plan or slug control plan, shall provide protection from accidental discharge of prohibited materials or other substances regulated by this article, and all significant industrial users shall submit to the Department detailed plans which show facilities and operating procedures to be implemented to provide protection against such accidental discharges. Facilities and measures to prevent and abate accidental discharges shall be implemented, provided, and maintained at the owner's or industrial user's cost or expense. Unless the significant industrial user has an approved spill prevention or slug control plan, all existing significant industrial users shall complete and submit such a plan within sixty (60) days of the effective date of this article, September 3, 2009. New significant industrial users shall submit such a plan prior to the time they commence discharging.

For purposes of this section, the information provided shall include the approximate average and maximum quantities of such prohibited materials or substances kept on the premises in the form of raw materials, chemicals

and/or waste therefrom and the containment capacity for each. Only substances that are in a form which could readily be carried into the POTW and constitute a concentration of five (5) percent or greater in the raw material, chemical solution or waste material, are required to be reported. Volumes of less than fifty-five (55) gallons, or the equivalent thereof, need not be reported unless lesser quantities could cause pass through or cause interference with the POTW. The industrial user shall promptly notify the Department of any significant changes or modifications to the plan including, but not limited to, a change in the contact person, or substance inventory.

(2) At least once every two (2) years, the Department shall evaluate whether a significant industrial user needs a plan to control slug discharges, as defined by 40 C.F.R. § 403.8(f)(2)(v). Unless otherwise provided, all significant users shall complete, implement, and submit such a plan within thirty 30 days of notification by the Department.

(j) Notification requirements. Unless a different notice is provided by this article or applicable law, within one (1) hour of becoming aware of a discharge into the POTW which exceeds or does not conform with federal, State or City laws, rules, regulations or permit requirements, or which could cause problems to the POTW, or which has the potential to cause the industrial user to implement its plan prepared in accordance with Subsection (i)(1) of this section, the industrial user shall telephone the Department at its control center and notify the Department of the discharge. The notification shall include the name of the caller, the location and time of discharge, the type of wastewater, the estimated concentration of excessive or prohibited pollutants and estimated volume, and the measures taken, or being taken, to abate the discharge into the POTW. Within five (5) calendar days after the discharge, the industrial user shall submit a detailed written report describing the cause of the discharge and the measures to be taken by the user to prevent similar future occurrences and when required by the Department, the industrial user's wastewater discharge permit may be modified to include additional measures to prevent such future occurrences. Such notification shall not relieve the industrial user of any expense, cost of treatment, loss, damages or other liability which may be incurred as a result of damage to the POTW, fish kills, or any other environmental impairment or any other damage to person or property.

(k) Notice to employees. A notice shall be permanently posted on the industrial user's bulletin board, or other prominent place, advising employees whom to contact in the Department in the event of an actual or excessive or prohibited discharge.

(l) Recovery of costs. Any user discharging in violation of any of the provisions of this article, which produces a deposit or obstruction, or causes damage to or impairs the department's POTW, or causes the Department to violate its NPDES permit, shall be liable to the Department for any expense, loss, damage, penalty or fine incurred by the Department because of said violation or discharge. Prior to assessing such costs, the Department shall notify the user of its determination that the user's discharge was the proximate cause of such damage, obstruction, impairment, or violation of the City's NPDES permit and the Department's intent to assess such costs to the user. Any such notice shall include written documentation which substantiates the determination of proximate cause and a breakdown of cost estimates. Failure to pay the assessed costs shall constitute a violation of this article. Such charge shall be in addition to, and not in lieu of, any penalties or remedies provided under this article, or this Code, or other statutes and regulations, or at law or in equity.

(m) Hazardous waste notification. All industrial users, who discharge into the City of Madison Heights collection system, shall notify the department in writing of any discharge of a substance which, if otherwise disposed of, would be a hazardous waste as set forth in 40 C.F.R. Part 261. Such notification must comply with the requirements of 40 C.F.R. § 403.12(p).

(n) Authorized representative. The authorized representative, as defined in section 29-110 of this Code, may designate a duly authorized representative of the individual designated in Section 29-110(a)(2)a. or b. where:

(1) The authorization is made in writing by the individual defined in Section 29-110(a)(2)a. or b.;

(2) The authorization specifies either an individual or a position having responsibility for the overall operation of the facility where the industrial discharge originates, such as the position of plant manager, operator of a well or well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and

(3) The written authorization is submitted to the Department.

(o) Pollution prevention. The Department shall encourage and support industrial users to develop and implement pollution prevention programs which eliminate or reduce pollutant contributions beyond the levels required by this article. The Department may require an industrial user

to implement pollution prevention initiatives or BMP, as part of an enforcement response, or as necessary to comply with its NPDES permit.

Sec. 29-112. Fees.

(a) The purpose of this section is to provide for the recovery of costs from users of the POTW. The applicable charges or fees established by the Board shall be sufficient to meet the costs of the operation, maintenance, improvement or replacement of the system, or as provided by law or by Board action.

(b) The Board shall adopt charges and fees which shall include, but not be limited to:

(1) Fees for reimbursement of costs of establishing, operating, maintaining, or improving the Department's industrial waste control and pretreatment programs; and

(2) User fees based upon volume of waste and concentration or quantity of specific pollutants in the discharge, and treatment costs including sludge handling and disposal; and

(3) Reasonable fees for reimbursement of costs for hearings including, but not limited to, expenses regarding hearings officers, court reporters, and transcriptions; and

(4) Other fees, which the Board may deem necessary, to carry out the requirements contained herein, or as may be required by law.

Sec. 29-113. Wastewater discharge permits.

(a) Required. It shall be unlawful for users to discharge into the POTW any wastewater which will cause interference or pass through, or otherwise not comply with the discharge prohibitions of Section 29-111 of this Code. It shall be unlawful for a significant industrial user to discharge into the POTW without a wastewater discharge permit from the Detroit Water and Sewerage Department. Unless otherwise expressly authorized by the Department through permit, order, rule or regulation, any discharge must be in accordance with the provisions of this article.

(1) All significant industrial users, which are in existence on the effective date of this article, shall apply for a wastewater discharge permit within thirty (30) days of the effective date of this article. Significant industrial users who are currently operating with a valid wastewater discharge permit are not subject to this provision.

These applications are to include all information specified in Subsection (c) of this section and, where applicable, any additional information which may be needed to satisfy the federal baseline monitoring report requirements of 40 C.F.R. § 403.12(b).

(2) All new significant users shall apply for a wastewater discharge permit at least ninety (90) days prior to commencement of discharge. The application must include all information specified in Subsection (c) of this section and, where applicable, any additional information that may be needed to satisfy the federal BMR requirements of 40 C.F.R. § 403.12(b). Until a permit is issued and finalized by the Department, no discharge shall be made into the POTW.

(3) Any user, who proposes to discharge any wastewater other than sanitary or noncontact cooling water into the POTW, shall request approval from the Department for the discharge(s) at least thirty (30) days prior to the commencement of the discharge.

(b) Permit application or reapplication. The Department may require any user to complete a questionnaire and/or a permit application and to submit the same to the Department for determining whether the industrial user is a significant user, or to determine changes in the wastewater discharges from a user's facility. Within thirty (30) days of being so notified, a user shall comply with the Department's request in the manner and form prescribed by the Department. Failure of the Department to so notify a user shall not relieve the user of the duty to obtain a permit as required by this article.

(1) A user, which becomes subject to a new or revised National Categorical Pretreatment Standard, shall apply for a wastewater discharge permit within ninety (90) days after the promulgation of the applicable National Categorical Pretreatment Standard, unless an earlier date is specified or required by 40 C.F.R. § 403.12(b). The existing user shall provide a permit application which includes all the information specified in Subsections (c) and (g) of this section.

(2) A separate permit application shall be required for each separate facility.

(3) Existing permittees shall apply for permit reissuance a minimum of ninety (90) days prior to the expiration of existing permits on a form prescribed by the Department.

(c) Application or reapplication information. In support of an application or reapplication for a wastewater discharge permit, the industrial user shall submit, in units and terms appropriate for evaluation, the following information:

(1) Corporate or individual name, any assumed name(s), federal employer identification number, address, and location of the discharging facility;

(2) Name and title of the authorized representative of the industrial user who shall have the authority to bind the industrial user financially and legally;

(4) Actual or proposed wastewater constituents and characteristics for each parameter listed in the permit application form. Such parameters shall include those applicable pollutants having numeric limitations as enumerated in Section 29-111(a) and (b) of this Code, those pollutants limited by national categorical pretreatment standards regulations for applicable industries and any toxic pollutants known or suspected to be present in the discharge, regulated in the previous permit, or specifically requested by the Detroit Water and Sewerage Department. For each parameter, the expected or experienced maximum and average concentrations during a one (1) year period shall be provided. For industries subject to national categorical pretreatment standards or requirements, the data requested herein shall be separately shown for each categorical process wastestream. Combined wastestreams proposed to be regulated by the combined wastestream formula shall also be identified. Sampling and analysis shall be performed in accordance with procedures established by the EPA pursuant to 33 U.S.C. § 1314(g) and contained in 40 C.F.R. Part 136, as amended. Where 40 C.F.R. Part 136 does not include sampling or analytical techniques for the pollutants in question, sampling and analysis shall be performed using validated analytical methods approved by the administrator.

(5) A listing and description of activities, facilities and plant processes on the premises. Those processes, which are subject to national categorical pretreatment standards or requirements, shall

be so designated. As pertains to Subsection (c)(4) of this section, identify which pollutants are associated with each process;

(6) Restricted to only those pollutants referred to in Subsection (c)(4) of this section, a listing of raw materials and chemicals which are either used in the manufacturing process or could yield the pollutants referred to in Subsection (c)(4). Any user claiming immunity from having to provide such information for reasons of national security shall furnish acceptable proof of such immunity;

(7) A description of typical daily and weekly operating cycles for each process in terms of starting and ending times for each of the seven (7) days of the week;

(8) Denote:

a. The average and maximum twenty-four (24) hour wastewater flow rates including, if any, daily, monthly and seasonal variations;

b. Each national categorical process wastestream flow rate and the cooling water, sanitary water and stormwater flow rates separately for each connection to the POTW; and

c. Each combined wastestream;

(9) A drawing showing all sewer connections and sampling manholes by the size, location, elevation and points or places of discharges into the POTW; also a flow schematic showing which connections receive each national categorical process wastestream and which connections receive stormwater, sanitary water or cooling water; also show which lines handle each combined wastestream. This schematic shall be cross-referenced to the information furnished in Subsection (c)(8) of this section;

(10) Each product produced by type, amount, process or processes and rate of production as pertains to processes subject to production based limits under the national categorical pretreatment standards or requirements only;

(11) A statement regarding whether or not the requirements of this article and of the national categorical pretreatment standards and requirements are being met on a consistent basis and, if not, what additional operation and maintenance work and/or additional construction is required for the industrial user to meet

the applicable standards and requirements. This statement shall be reviewed and signed by the authorized representative and, as appropriate, certified by a qualified professional;

(12) Basic information on the program for the prevention of accidental discharges in accordance with the requirements of Section 29-111(i) of this Code;

(13) Proposed or actual hours of operation of each pretreatment system for each production process;

(14) A schematic and description of each pretreatment facility which identifies whether each pretreatment facility is of the batch type or continuous process type;

(15) If other than Detroit Water and Sewerage Department potable water, the industrial user's source of intake water together with the types of usage and disposal method of each water source, and the estimated wastewater volumes from each source;

(16) If additional construction and/or operation and maintenance procedures will be required to meet the requirements of this article and the national categorical pretreatment standards, the shortest schedule by which the user will provide such additional construction and/or implement the required operation and maintenance procedures;

(17) Identify whether the user has conducted a waste minimization assessment or audit of its operations in order to identify all feasible source reduction and recycling practices that may be employed to reduce or eliminate the generation of pollutants and other waste at the facility; and

(18) Any other information as may reasonably be required to prepare and process a wastewater discharge permit.

(d) Permit issuance. Upon receipt of an application, the Department shall review the application, determine, and so notify the industrial user in writing regarding any of the following:

(1) The industrial user does not meet the definition of a significant industrial user and is not required to have a wastewater discharge permit;

(2) The industrial user does meet the definition of a significant industrial user but is found by the Department to have no reasonable potential for adversely affecting the POTW operation or for violating any pretreatment standard or requirement, and is not required to have a wastewater discharge permit. The Department shall make such determination in accordance with the requirements of 40 C.F.R. § 403.8(f)(6);

(3) The application is incomplete or the information only partially satisfies the information and data required by 40 C.F.R. § 403.12 or by the Department, and that additional information and data are required which shall be promptly furnished. Where appropriate, the industrial user is notified regarding specific information that is missing, or that the application is unacceptable;

(4) The industrial user is required to have a wastewater discharge permit. The Department shall notify the industrial user of its determination and the basis of the determination.

The Department may withhold issuance of a permit to a significant user, which has not submitted an adequate or timely report, or permit application, to the Department as the control authority in accordance with the reporting requirements of 40 C.F.R. § 403.12, or whose discharge is in violation of this article. If the Department determines that an industrial user is required to have a wastewater discharge permit and has evaluated and accepted the data furnished, the industrial user will be notified accordingly by certified mail. The notification shall contain a copy of the draft permit, so marked, for the industrial user's review. An industrial user has thirty (30) days from the date of mailing to file a response to the draft permit and, in accordance with the procedures contained in Section 29-113.6 of this Code, twenty (20) days from the date of mailing to file an appeal regarding a permit issued as final. Upon disposition by the Department of any contested terms or conditions, a permit shall be issued as final. Only one facility location shall be included in each permit.

(e) Permit conditions. Wastewater discharge permits shall contain all requirements of 40 C.F.R. § 403.8(f)(1)(iii) and shall be deemed to incorporate all provisions of this article, other applicable laws, rules, regulations, and user charges and fees established by the City of Detroit or City of Madison Heights without repetition therein. In addition, permits may contain the following:

(1) Limits on the average and maximum wastewater constituents or characteristics which are equivalent, more restrictive than, or

supplemental to the numeric limits enumerated in Section 29-111 of this Code, or the applicable national categorical pretreatment standards;

(2) Limits on average, and maximum rate and time of discharge or requirements for flow regulation and equalization;

(3) Requirements for installation, operation, and maintenance of discharge sampling manholes and monitoring facilities by the industrial user;

(4) Restrictions on which of the user's discharge wastestreams are to be allowed to be discharged at each point of connection to the POTW;

(5) Specifications for industrial user monitoring programs which may include sampling locations, frequency and type of sampling, number, types and standards for tests and reporting schedules;

(6) Requirements for the prevention of accidental discharges and the containment of spills or slug discharges;

(7) Restrictions based on the information furnished in the application;

(8) Additional reporting requirements:

a. All permittees shall submit a report on the form prescribed by the Department, or on an alternative form approved by the Department, indicating the status of compliance with all conditions enumerated or referred to in the wastewater discharge permit, or made applicable to the permit by this article. Unless required more frequently, the reports shall be submitted at six (6) month intervals on a schedule to be established by the Department. Analytical data generated by the Department may not be submitted in lieu of the facility's own monitoring data as required by the wastewater discharge permit.

b. Permittees not subject to national categorical pretreatment standards or requirements shall submit a report in accordance with the requirements of Subsections (e)(8)d. and e. of this section. The report shall show the concentration of each substance for which there is a specific limitation in the permit, or which may be identified by the

Department in accordance with Subsections (e)(9) and (11) of this section.

c. Permittees subject to national categorical pretreatment standards or requirements shall submit compliance reports at the times and intervals specified by federal regulations and by the Department. A compliance report shall be submitted to the Department no later than ninety (90) days following the final compliance date for a standard, or in the case of a new source, no later than ninety (90) days, following commencement of the introduction of wastewater into the POTW, and in accordance with 40 C.F.R. § 403.12(d). A report on continued compliance shall be submitted at six (6) month intervals thereafter on the schedule established by the Department and incorporated into the industrial users discharge permit and in accordance with Subsections (e)(8)d. and e. of this section. The reports shall be either on a form prescribed by the Department or on an alternate form approved by the Department, and shall indicate the nature and concentration of all pollutants in the discharge from each regulated process which are limited by national categorical pretreatment standards, or which there is a specific limitation in the permit, or which may be identified by the Department in accordance with subsections (e)(9) and (11) of this section. The report shall include a record of measured or estimated average and maximum daily flows for the reporting period for the discharges regulated by the permit. The combined wastestream formula may be used for reporting purposes after the initial information has been furnished to the Department, provided there have been no changes to the elements composing the combined wastestream.

d. Reports shall contain the results of representative sampling performed during the period covered by the report and of the discharge and analysis of pollutants contained therein, and, for significant industrial users subject to production based standards, shall be cross-referenced to the related flow or production and mass as required to determine compliance with the applicable pretreatment standards. The frequency of monitoring shall be as prescribed in the applicable general pretreatment regulations, being 40 C.F.R. § Part 403, or by the Department, but no less than is necessary to assess and assure compliance by the industrial user with the most stringent applicable pretreatment

standards and requirements. All sampling and analysis shall be performed in accordance with applicable regulations contained in 40 C.F.R. Part 136 and amendments thereto. Where 40 C.F.R. Part 136 does not include sampling or analytical techniques for the pollutants in question, sampling and analysis shall be performed using validated analytical methods approved by the administrator. If an industrial user monitors any pollutant more frequently than required by the Department using the procedures as prescribed in this section, the results of this monitoring shall be included in such report. The report shall state whether the applicable pretreatment standards are being met on a consistent basis and, if not, what additional operation and maintenance practices and/or pretreatment system improvements or changes are necessary to bring the industrial user into compliance with the applicable pretreatment standards.

e. This report, and those required under Section 29-111(c)(5) of this Code and Subsections (e)(8)b. and c. of this section, shall include the following certification statement:

"I certify under penalty of law that this document and all attachments were prepared under my direction, or supervision, in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and/or imprisonment for knowing violations."

Said certification shall be signed by the facility's authorized representative, as defined in Section 29-110 (a) (2) of this Code. If an authorization is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for environmental matters for the company, a new authorization satisfying the requirements of the authorized representative definition must be submitted to the Department prior to, or together with, any reports to be signed by an authorized representative.

f. If sampling performed by a permittee indicates a violation, the user shall notify the Department within twenty-four (24) hours of the time said user becomes, or should have become, aware of the violation. In addition, the user shall repeat the sampling and analysis, and submit the results of the repeat analysis to the Department within thirty (30) days after said user becomes, or should have become, aware of the violation.

(9) In the event the Director determines that an industrial user is discharging substances in quality, quantity or at locations which may cause problems to the POTW, or the receiving stream, the Department has the authority to develop and enforce effluent limits applicable to the user. To the extent the Department seeks to impose restrictions in a permit which are more restrictive than established in this article, the Department shall provide written documentation to explain the greater restriction for protection against pass through, interference, or violation of the NPDES permit;

(10) Requirement for pollution prevention initiatives; and

(11) Other requirements reasonably necessary to ensure compliance with this article.

(f) Permit duration. Permits shall be issued for a specified time period. Except as deemed necessary by the Department, or as otherwise provided for under this article, permits shall be issued for a specified period of not more than five (5) years nor less than one (1) year. The existing permit for significant industrial users, who timely submit an application for permit reissuance to the Department, shall be automatically extended until a permit is issued as final.

(g) Permit modification. The terms and conditions of the permit may be subject to modification by the Department during the term of the permit as limitations or pretreatment standards and requirements identified in Section 29-111 of this Code are amended, or other just cause exists. Just cause for a permit modification includes, but shall not be limited to, the following:

(1) Material or substantial changes to an industrial user's facility or operation, or changes in the characteristics of the industrial user's effluent. It shall be the industrial user's duty to request an

application form and apply for a modification of the permit within thirty (30) calendar days of the change;

(2) Change(s) in the Department's NPDES permit;

(3) Embodiment of the provisions of a legal settlement or of a court order;

(4) Any changes necessary to fulfill the Department's role as control authority;

(5) An industrial user's noncompliance with portions of an existing permit;

(6) A change of conditions within the POTW;

(7) A finding of interference or pass through attributable to the industrial user;

(8) Amendments to, or promulgation of, national categorical pretreatment standards or requirements including 40 C.F.R. Part 403 and those delineated in Appendix A of this article. Permittees shall request an application form and apply to the Department for a modified permit within ninety (90) days after the promulgation of a new or revised national categorical pretreatment standard to which the industrial user shall be subject. Information submitted pursuant to this subsection shall be confined to that information related to the newly promulgated or amended national categorical pretreatment standard or requirement. However, information previously submitted need not be duplicated, insofar as the previously submitted information continues to be current and applicable. In addition, the Department may initiate this action;

(9) Changes in the monitoring location. (See Section 29-113.1 of this Code);

(10) Typographical errors or omissions in permits;

(11) The Department may modify the permit on its own initiative based on its findings or reasonable belief of the above; or

(12) The user may request a modification of the permit. When initiated by the Department, the industrial user shall be informed of any proposed change in its permit. The Department will issue a draft permit and an industrial user has thirty (30) days to file a

response to the draft modified permit. Thereafter, the Department will issue a final permit and, unless appealed in accordance with the procedures contained in Section 29-113.6 of this Code, the permit will become effective twenty (20) days after issuance.

(h) Permit custody and transfer. Wastewater discharge permits are issued to a specific person as defined herein for a specific discharge. A wastewater discharge permit shall not be reassigned or transferred or sold to a different person, new owner, new industrial user, different premises, or a new or changed operation without notice to and written approval of the Department, and providing a copy of the existing permit to the new owner or operator. It shall be the permit holder's duty to notify the Department of any such change at least thirty (30) days before the date of the change. Wastewater discharge permits, which do not receive the written approval of the Department prior to the change, shall be null and void regardless of reassignment, or transfer, or sale. If it has occurred, the Department may revoke a permit. If a change takes place, the Department may require the application for a new or modified permit. Any succeeding person shall comply with the terms and conditions of any existing permit which the Department allows to be retained.

(i) Permit notification requirements. All industrial users shall promptly notify the Department in advance of any substantial change in the volume or character of pollutants in their discharge, including the listed or characteristic hazardous waste for which initial notification under 40 C.F.R. § 403.12(p) has been made, request a permit application form, and apply for a modification of the permit at least thirty (30) calendar days prior to the change. Failure of the industrial user to so apply shall be considered a violation of this article.

Sec. 29-113.1. Monitoring facilities.

(a) Significant industrial users shall provide, operate and maintain at their own expense a sampling manhole or special structure to facilitate monitoring, inspection, sampling, and flow measurement of their discharge by the Department and the industrial user, and to enable the Department to conduct such other monitoring and sampling as required for determining compliance with discharge requirements, limits and standards as provided for in this article. In the event the Department determines that the monitoring facility identified in the permit application is inadequate, a new monitoring facility must be identified, or provided, which shall allow for collection of a representative sample of the wastewater discharged from the facility. Unless otherwise determined at the discretion of the Department, said facility shall be provided within

ninety (90) days of receipt of notification by the Department. The industrial user shall provide the Department with:

(1) A drawing showing all sewer connections and sampling manholes by the size, location, elevation, and points or places of discharges into the POTW;

(2) A flow schematic showing:

a. Which connections receive each national categorical process wastestream,

b. Which connections receive stormwater, sanitary water or cooling water, and

c. Which lines handle each combined wastestream.

This report shall be certified by a professional engineer. If a significant industrial user fails to install the monitoring facilities within the prescribed time limits, then the Department may install such structure or device and the significant user shall reimburse the Department for any costs incurred therein.

(b) The sampling manhole should be situated on the industrial user's premises in a location readily accessible to the Department. When such a location would be impractical or cause undue hardship to the industrial user, the Department may allow the facility to be constructed in the public street or sidewalk area when there is room and the location will not be obstructed by landscaping or parked vehicles. It shall be the responsibility of the industrial user to obtain any necessary approvals which may be required from other government agencies for the location and construction of monitoring facilities. There shall be ample room in or near such sampling or monitoring manhole or facility to allow accurate sampling and preparation of samples for analysis. The facility and any permanently installed sampling and measuring equipment shall be maintained at all times in a safe and proper operating condition at the expense of the industrial user. Whether constructed upon public or private property, the sampling and monitoring facilities shall be provided in accordance with the Department's requirements and all applicable local construction standards and specifications. (See Section 29-113(g).)

Sec. 29-113.2. Inspection, sampling and record-keeping.

(a) For purposes of administering and enforcing this article, any other applicable provisions of this Code or applicable State or Federal laws and

regulations, the Department may inspect the establishment, facility or other premises of the industrial user. The Department's employees or authorized representative shall have access to the industrial user's premises for purposes of inspection, sampling, compliance monitoring and/or metering activities.

(b) Each such inspection or sampling activity shall be commenced and completed at reasonable times, and in a reasonable manner. Upon arrival at the industrial user's premises, the Department shall inform the industrial user, or the industrial user's employees, that sampling and/or inspection is commencing, and that the facility's authorized representative has the right to observe the inspection and/or sampling. The Department shall neither refrain from, nor be prevented or delayed from, carrying-out its inspection or sampling duties due to the unavailability of the authorized representative of the facility to observe or participate in the inspection or sampling activity.

(c) While performing work on private property, employees or authorized representatives of the Department shall observe all reasonable safety, security and other reasonable rules applicable to the premises as established by the industrial user. Duly authorized employees or representatives of the Department shall bear proper credentials and identification, and at the industrial user's option may be accompanied by a duly authorized representative of the industrial user. Duly authorized Department representatives shall not be restricted from viewing any of the facility site. Department employees or representatives may take photographs of facilities subject to this article, which shall be maintained by the Department as confidential in accordance with Section 29-113.3 of this Code.

(d) Where an industrial user has security measures in force, the industrial user shall make prompt and necessary arrangements with the security personnel so that, upon presentation of appropriate credentials, personnel from the Department will be permitted to enter for the purposes of performing their specific responsibilities.

(e) Significant industrial users shall sample and analyze their discharge in accordance with the provisions of their permit. The Department may require such samples to be split with the Department for the Department's independent analysis.

(f) Industrial users shall maintain records of all information from monitoring activities required by this article, or by 40 C.F.R. § 403.12(n). Industrial users shall maintain the records for no less than three (3) years. This period of record retention shall be extended during the course

of any unresolved litigation regarding the discharge of pollutants by the industrial user, or the operation of the City of Detroit's industrial waste program, or when requested by the Department, by the State, or by the EPA.

(g) Upon the request of the Department, industrial users shall furnish information and records relating to discharges into the POTW. Industrial users shall make such records readily accessible to the Department at all reasonable times, and allow the Department to copy such records.

(h) In the event the Department obtains samples, and analyses are made of such samples, a copy of the results of such analyses shall be promptly furnished upon written request by the industrial user's authorized representative. When requested by the industrial user, the Department employee or representative shall leave with the user, a portion of any sample of the user's discharge taken from any sampling point on or adjacent to the premises for the user's independent analysis. In cases of disputes arising over shared samples, the portion taken and analyzed by the Department shall be controlling unless proven invalid.

(i) In addition to any other violation caused by the discharge described herein, in the event a single grab sample of the industrial user's discharge is obtained by the Department, and then analyzed in accordance with 40 C.F.R. Part 136, and found to contain concentrations of pollutants which are two (2) or more times greater than the numeric limitations as listed in Section 29-111(b) of this Code, or as contained in the facility's wastewater discharge permit, the industrial user shall implement its slug control plan, and shall provide a written report to the Department within fourteen (14) days, which describes the cause of greater concentration and provides a description of the means by which future discharge concentrations will be held to values of less than two (2) times the limitation in the future.

Sec. 29-113.3. Confidential information.

(a) Information and data on an industrial user obtained from written reports, questionnaires, permit applications, permits and monitoring programs, and from inspections shall be available to the public or other governmental agencies without restriction unless the industrial user specifically requests and is able to demonstrate to the satisfaction of the Department that the release of such information would divulge information, processes or methods of production entitled to protection as trade secrets of the industrial user.

When submitted to the Department, all information claimed to be confidential must be clearly marked "confidential". When requested by the person furnishing the report, the portions of a report determined by the Department to disclose trade secrets or trade secret processes, and which are clearly labeled as confidential, shall not be made available for inspection by the public, but shall be made available upon request to governmental agencies for uses related to this article, to the National Pollutant Discharge Elimination System (NPDES) permit, and to the State Disposal System permit and/or the pretreatment programs, provided, however that information shall be treated as confidential by the governmental agency, until such time as the information has been determined to be non-confidential by the governmental agency. Confidential information on industrial users, which the Department releases pursuant to a request of another governmental agency, should be handled by the other governmental agency pursuant to its own confidentiality procedures. The Department cannot control how another governmental agency handles such confidential information, and assumes no responsibility for the disposition of the information released to the governmental agency. The Department will use sufficient care to inform the other governmental agency of the existence of the industrial user's confidentiality claim.

The Department shall determine whether the information requested to be treated as confidential, in fact, satisfies the requirements of confidential information as defined herein. The decision of the Department shall be made in writing.

Wastewater constituents and characteristics will not be recognized as confidential information.

(b) Except as otherwise determined by the Department or provided for by applicable law, all information with respect to an industrial user on file with the City shall be made available upon request by such user or the user's authorized representative during normal business hours.

Sec. 29-113.4. Statutes, laws and regulations.

The National Categorical Pretreatment Standards defined in 40 C.F.R. Chapter I, Subchapter N, Parts 405-471, shall be and are incorporated by reference herein and made a part hereof. Unless otherwise provided, any reference in this article to a code, standard, rule, regulation, or law enacted, adopted, established, or promulgated by any private organization, or by any element or organization of government other than the City of Madison Heights shall be construed to apply to such code, standard, rule, regulation, or law in effect or as amended or promulgated, from the date of enactment of this article.

Sec. 29-113.5. Enforcement.

(a) Violations. It shall be a violation of this article for any user to:

(1) Fail to completely and/or accurately report the wastewater constituents and/or characteristics of the industrial user's discharge;

(2) Fail to report significant changes in the industrial user's operations or wastewater constituents and/or characteristics within the time frames provided in Section 29.113(g)(1) of this Code;

(3) Refuse reasonable access to the industrial user's premises, waste discharge, or sample location for the purpose of inspection or monitoring;

(4) Restrict, lockout or prevent, directly or indirectly, access to any monitoring facilities constructed on public or private property. The locking or securing of the monitoring facility shall not constitute a violation pursuant to this subsection, provided, that upon request reasonable access to the facility is promptly provided to the Department;

(5) Restrict, interfere, tamper with, or render inaccurate any of the Department's monitoring devices including, but not limited to, samplers;

(6) Fail to comply with any condition or requirement of the industrial user's wastewater discharge permit;

(7) Fail to comply with any limitation, prohibition, or requirement of this article including any rule, regulation, or order issued hereunder. Industrial users acting in full compliance with wastewater discharge permits issued prior to the effective date of this article shall be deemed to be in compliance with the requirements of this article, and such permits shall remain in effect and be enforceable under this article until a superseding permit is effective. Industrial users shall comply with applicable National Categorical Pretreatment Standards and requirements on the date specified in the Federal Regulations, regardless of compliance schedules.

(b) Upsets. An upset shall constitute an affirmative defense to an action brought for noncompliance with National Categorical Pretreatment Standards where the requirements of Subsection (1) of this Subsection (b) are met.

(1) An industrial user who wishes to establish the affirmative defense shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence, that:

a. An upset occurred and the industrial user can identify the cause(s) of the upset;

b. At the time, the facility was being operated in a prudent and workmanlike manner and in compliance with applicable operation and maintenance procedures;

c. The industrial user has submitted the following information to the Department, orally or in writing, within twenty-four (24) hours of becoming aware of the upset and where this information is provided orally, a written submission must be provided within five (5) days:

(i) A description of the discharge and cause of noncompliance;

(ii) The period of noncompliance including exact dates and times or, if not corrected, the anticipated time the noncompliance is expected to continue; and

(iii) Steps being taken and/or planned to reduce, eliminate and prevent recurrence of the noncompliance.

(2) In any enforcement proceeding, the industrial user seeking to establish the occurrence of an upset shall have the burden of proof;

(3) The industrial user shall control production of all discharges to the extent necessary to maintain compliance with this article upon reduction, loss, or failure of its treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost or fails.

(c) Bypass. Bypasses are prohibited unless the bypass does not cause a violation of pretreatment standards or requirements, but only if it is for essential maintenance to ensure efficient operation of the treatment system. These bypasses are not subject to the provisions of Subsections (1) and (2) of this section.

(1) Notice of anticipated bypass. Industrial users anticipating a bypass shall submit notice to the Department at least ten (10) days in advance.

(2) Notice of unanticipated bypass. An industrial user shall submit oral notice of an unanticipated bypass that exceeds applicable pretreatment standards within twenty-four (24) hours from the time the industrial user becomes or should have become aware of the bypass. A written submission shall be provided within five (5) days of the time the industrial user becomes or should have become aware of the bypass. The written submission shall contain a description of the bypass including exact dates and times, and if the bypass has not been corrected, the anticipated time it is expected to continue, and steps taken or planned to reduce, eliminate and prevent reoccurrence of the bypass.

(3) Prohibition of bypass and enforcement. Bypass is prohibited, and the Department may take enforcement action against a user for a bypass, unless:

a. The bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

b. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated waste, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate backup equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventative maintenance; and

c. The industrial user properly notified the Department as described in Subsection (c)(2) of this section.

(4) Bypass approval. Where it meets all conditions in Subsection (c)(3) of this section, the Department may approve an anticipated bypass.

(d) Where one (1) or more of the measurements taken for any pollutant defined in Section 29.111(b) of this Code during a six (6) month period exceed by any magnitude the daily maximum non-detect limit for the same parameter, the industrial user may develop and implement pollution prevention initiatives, or a BMP, as part of its response. The Department may, as part of an Administrative Order, also require development of a BMP as a part of the Department's enforcement response. Upon approval of the Department, these pollution prevention initiative, or BMPs shall be made an enforceable part of the wastewater discharge permit. Industrial users shall provide, at six (6) month intervals, analytical results and certifications in support of its implementation of an approved pollution prevention initiative or BMPs. Upon demonstration of compliance, the industrial user may request to be relieved of this implementation requirement.

(e) Emergency suspensions and orders. The Department may order suspension of the sewer or wastewater treatment service and/or a wastewater discharge permit where, in the opinion of the Department, such suspension is necessary to stop any actual or threatened discharge which presents or may present an imminent or significant hazard to the health or welfare of persons or to the environment, interferes or may interfere with the POTW, or causes or may cause the City of Detroit to violate any condition of its NPDES permit. Any person notified of a suspension of the sewer or wastewater treatment service and/or the wastewater discharge permit shall immediately stop or eliminate the contribution. In the event the Department provides informal notification under this section, written confirmation and an order shall be provided within twenty-four (24) hours. In the event of a failure of the person to comply voluntarily with any suspension or revocation order, the Department shall take such steps as deemed necessary, including immediate severance of the sewer connection or services, to prevent or minimize damage to the POTW system or danger to any individual or the environment. In the event such steps are taken, the Director shall notify the industrial user within twenty-four (24) hours in writing of such action and order, and the specific recourse available. In any event, the Department shall provide the industrial user with an opportunity for a hearing before the Director, or his designated representative, within ten (10) days of such action. The industrial user shall submit a detailed written statement to the Department within fifteen (15) days of the occurrence describing the causes of the harmful contribution and the measures taken to prevent any future occurrence. Upon proof of elimination of the noncomplying discharge, the Department shall reinstate the wastewater discharge permit and/or the sewer or wastewater treatment service.

(f) Notice of violation. Except in the case of an actual or threatened discharge as specified in Subsection (e) of this section, whenever the Department has reason to believe that any industrial user has violated or is violating this article, the Department shall serve a written notice stating the nature of the violation upon such industrial user. Where applicable, the Department shall pursue appropriate escalating enforcement action as defined within its approved enforcement response plan. The failure of the Department to issue a notice of violation shall not preclude the department from escalating its enforcement response.

(g) Administrative actions. Whenever the Department has reasonable grounds to believe that a user is violating, or has violated, a provision of its wastewater discharge permit, or a pretreatment standard or requirement or any prohibition of this article, the Department, except in the case of emergency or flagrant violation, may initiate appropriate administrative enforcement action in order to compel the industrial user to eliminate or to remedy such violation as soon as possible.

(1) a. Conferences. The Department may order any person, who violates this article, to attend a conference wherein the Department may endeavor to cause the user to eliminate or remedy the violation by establishing an enforceable compliance schedule. The notice of violation shall be served at least ten (10) days before the scheduled conference and shall set forth the date, time, and place thereof. The conference shall be conducted by a representative of the Department. The industrial user shall present a plan and schedule for achieving compliance with this article. Nothing contained herein shall require the Department to accept or agree to any proposed plan or schedule, or to prevent the Department from proceeding with a show cause hearing as set forth in Subsection (2) of this Subsection (g). If the attendees agree upon a compliance schedule, the user and the Department's duly authorized representative may enter, by consent, into a compliance agreement or an administrative order setting forth the terms of such agreement. An industrial user must exhibit good faith and expeditious efforts to comply with this article and any procedures, requirements, and agreements hereunder.

b. Compliance schedules. The user and the Department may agree upon a schedule which sets forth the terms and conditions, and time periods or schedules for completion of actions to remedy or to eliminate the causes of violation. These schedules may be developed as part of a compliance agreement, or an administrative consent order. Schedules

developed under this Subsection shall adhere to the following conditions:

i. The schedule shall contain increments of progress in the form of dates for the commencement and completion of major events leading to the construction and operation of upgraded or additional pretreatment facilities, or to the implementation of additional operation and maintenance procedures required for the industrial user to meet the applicable pretreatment requirements and standards including, but not limited to, hiring an engineer, completing preliminary plans, completing final plans, executing contracts for major components, commencing construction, and completing construction;

ii. No single increment referred to in Subsection (i) of this section shall exceed nine (9) months;

iii. Not later than 14 days following each date in the schedule and the final date for compliance, the industrial user shall submit a progress report to the department including, at a minimum, whether it complied with the increment of progress to be met on such date and, if not, the date which it expects to comply with this increment of progress, the reason(s) for delay, and the steps being taken by the industrial user to return to the established schedule; and

iv. Any deviations from the compliance schedule may result in the industrial user being found in violation of this article.

c. Administrative orders. The Department may order any industrial user, who violates or continues to violate this article or a duly issued permit, to install and to properly operate devices, treatment facilities, or other related appurtenances. In addition, orders may contain such other requirements as might reasonably be necessary and appropriate to address the violation including the installation of pretreatment technology, additional self-monitoring and management practices, implementation of a waste minimization assessment to identify and implement feasible source reduction, and recycling practices to reduce the generation or release of pollutants at the facility. An

order may be either an administrative consent order, which is the result of an agreement, or a unilateral administrative order.

(2) Show cause hearing. The Department may order any industrial user, who violates this article or allows such violation to occur, to show cause before the Department why a proposed enforcement action should not be taken. A notice shall be served upon the industrial user specifying the time and place of a hearing before the Department regarding the violation, the reason(s) why the action is to be taken, the proposed enforcement action, and directing the industrial user to show cause before the Department why any proposed enforcement action should not be taken. The notice of the hearing shall be served personally, or by registered or certified mail with return receipt requested, at least ten (10) days before the hearing. Service may be made upon any agent or officer of a corporation, or its authorized representative.

a. Hearing proceeding. The hearing shall be conducted in accordance with the procedures adopted by the Board. A hearings officer shall conduct the show cause hearing and take the evidence, and may:

i. In the name of the Board, issue notices of hearing requesting the attendance and testimony of witnesses and the production of evidence relevant to any matter involved in such hearing;

ii. Transmit a report of the evidence and hearing, including transcripts and other evidence, together with recommendations to the Director for action thereon.

b. Transcript. At any show cause hearing held pursuant to this article, testimony shall be recorded by a court reporter.

(3) Actions. After a show cause hearing has been conducted, the hearings officer shall issue an order to the industrial user directing any of the following actions:

a. Immediate compliance with the industrial user's wastewater discharge permit or with any applicable limitation, condition, restriction or requirement of this article, or applicable local, State or Federal law or regulation;

b. Pretreatment of waste by installation of adequate treatment equipment or proper operation and maintenance of existing treatment equipment be accomplished within a specified time period;

c. Submission of compliance reports on effluent quality and quantity as determined by self-monitoring and analysis during a specified time period;

d. Submission of periodic reports on effluent quality and quantity determined by self-monitoring analysis throughout the final period set by a compliance date;

e. Control of discharge quantities;

f. Payment of costs for reasonable and necessary inspection, monitoring, and administration of the industrial user's activities by the Department during compliance efforts; and/or

g. Any such other orders as are appropriate including, but not limited to, immediate termination of sewer or wastewater treatment services, or revocation of a wastewater discharge permit, or orders directing that following a specified time period sewer or wastewater treatment service will be discontinued unless adequate treatment facilities, devices, or operation and maintenance practices have been employed.

h. A finding the user has demonstrated by a preponderance of the evidence that a violation either of this article or of a duly issued permit did not occur.

(4) Public notification of significant noncompliance. The Department shall publish in the largest daily newspaper published in the City of Detroit and the City of Madison Heights a list of all industrial users which were in significant noncompliance with applicable pretreatment requirements at any time during the previous twelve (12) months. All industrial users identified in a proposed publication shall be provided with a copy of the proposed notice at least thirty (30) days before publication and allowed an opportunity to comment as to its accuracy.

(h) Legal actions.

(1) Criminal action. Any user, who violates any provision of this article including the failure to pay any fees, fines, charges or surcharges imposed hereby, or any condition or limitation of a permit issued pursuant thereto, or who knowingly makes any false statements, representations or certification in any application, record, report, plan or other document filed or required to be maintained pursuant to this article or wastewater discharge permit, or who tampers with or knowingly renders inaccurate any monitoring device required under this article, is guilty of a misdemeanor and, upon conviction, shall be punished by a fine not to exceed five hundred dollars ($500.00) for each violation per day, or by imprisonment for not more than ninety (90) days, or by both. The Department is hereby authorized, through its counsel, to seek prosecution of criminal charges against any person violating any provision of this article.

(2) Civil action. Whenever the Department has reasonable grounds to believe that a user is violating, or has violated, a provision of its wastewater discharge permit, a pretreatment standard or requirement or any requirement of this article, the Director may commence a civil action to compel compliance in a court of competent jurisdiction to enjoin the user from discharging, and/or to obtain appropriate relief to remedy the violations. The Department or Board may also seek additional legal and/or equitable relief. The commencement of suit neither constitutes an exclusive election of remedies nor prohibits the Department, Director, Board, or City of Detroit from commencing action in Federal Court for discharges believed to be in violation of this article, State and Federal requirements contained in the Clean Water Act, the City of Detroit's NPDES permit, or other applicable laws or requirements. In addition, the City of Detroit may recover the reasonable attorney fees, court costs, court reporters' fees, and other unusual expenses related to enforcement activities or litigation against the person found to have violated this article, or the orders, rules, regulations and permits issued hereunder.

(3) All fines, costs, and penalties which are imposed by any court of competent jurisdiction shall be payable to the City of Detroit Water and Sewerage Department.

Sec. 29-113.6. Reconsideration and appeal.

Through the procedures of reconsideration and appeal, a user may contest actions, determinations, or decisions of the Department which result from its construction, application and enforcement of this article. The

procedures contained within this section govern reconsideration and appeal with respect to construction, application, and enforcement of this article.

(a) Selection of reconsideration or of appeal.

(1) Except for those actions, determinations, or decisions which are expressly identified as subject only to appeal, reconsideration may be requested by any permit applicant, permittee, authorized industrial wastewater discharger or other discharger, who is adversely affected by any action, determination, or decision that is made by, or on behalf of, the Department by the Director, or an authorized representative, and that interprets, implements or enforces the provisions of this article.

(2) An appeal may be requested by any permit applicant, permittee, authorized industrial wastewater discharger or other discharger, who is adversely affected:

i. By a permit issued as final by the Department, or

ii. By an administrative order entered after a show cause order and hearing, or after a hearing for reconsideration.

(3) Unless otherwise expressly provided for by this article, a request for reconsideration or appeal must be signed by an authorized representative, and received at the Department's General Offices within twenty (20) days from the date of the occurrence of the action, determination, or decision in dispute. A request for reconsideration shall contain the requester's name and address, a brief statement of the reason(s), and the factual basis underlying the request.

(4) A request for reconsideration shall be filed in triplicate either by hand delivery or by certified mail to the General Offices of the Department. Where a request for reconsideration or appeal either is not filed within the time period provided for in this Subsection or is improperly made, the action, determination or decision of the Director, or the Department's authorized representative, is final and any right to reconsideration or appeal may be deemed waived.

(b) Reconsideration. Within fifteen (15) days after receipt of a timely and proper request for reconsideration, the Department shall notify the applicant of the time and place for a hearing.

(1) A hearing for reconsideration shall be conducted by a hearings officer who is designated by the Director and may be an employee of the Department. The decision of the hearings officer shall be in the form of a recommendation to the Director and embodied in an administrative order. Except for an administrative consent order that was negotiated and agreed to by both parties, an administrative order is appealable in accordance with Subsection (c) of this section.

(2) Where improperly or untimely submitted, the Department may reject a request for reconsideration. The Department shall notify the requester in writing that the request has been rejected.

(3) Unless the date is mutually extended by both parties, the hearing shall be conducted neither less than ten (10) days nor more than thirty (30) days after mailing of the notice. For cause and at the discretion of the hearings officer, the hearing may be continued for a reasonable time.

(4) The hearing for reconsideration shall be an informal consultation and conference where the requester in person, or by counsel, shall present their argument, evidence, data, and proof in connection with the issue(s) being reconsidered. The parties shall not be bound by the Michigan Rules of Evidence. The hearing shall be transcribed and the requester may obtain a copy of the hearing transcript, as appropriate, from the Department or from the court reporter.

(5) Within thirty (30) days after the close of the hearing, the hearings officer shall issue a final decision which shall contain a recommendation to the Director. The hearings officer shall send such decision to the requester by certified mail.

(6) Unless such action is necessary to prevent pass-through, interference or other harm to the POTW, to the public or to the waters of this State, the filing of a request for reconsideration in accordance with this Section shall stay the action by the Department that is the subject of the hearing for reconsideration.

(c) Appeal. Within thirty (30) days after receipt of a timely and proper request for an appeal, the Department shall notify the applicant in writing regarding the time and place for a hearing. The hearing shall be conducted in accordance with procedures set by the Board until rules are promulgated pursuant to Section 2-111 of the 1997 Detroit City Charter. In addition:

(1) Any request for an appeal must be made within twenty (20) days of the Department's action, determination or decision regarding the request for reconsideration or any permit issued in accordance with this article.

(2) Where a request either is not filed within the time period contained in this subsection or is improperly made, the action, determination or decision of the Director, or the Department's authorized representative, is final and any right to appeal may be deemed waived. Where untimely or improperly submitted, the Department may reject the request for an appeal, and shall notify the requester in writing that such request has been rejected.

(3) The Department shall appoint a hearings officer. The hearings officer shall review the evidence, and within fifteen (15) days after the close of the hearing shall issue a written recommendation to uphold, modify or reverse the action, determination, or decision of the Department.

(4) The written recommendation of the hearings officer shall be submitted to the Board which shall render a final decision within thirty (30) days of its next regularly scheduled meeting.

(5) In accordance with applicable law, the user or the Department may appeal any final decision of the Board to a court of competent jurisdiction.

(6) Unless such action is necessary to prevent pass through, interference, or other harm to the POTW, to the public or to the waters of this State, the filing of a request for appeal in accordance with this section shall stay the action by the Department that is the subject of the appeal.

An Industrial User may elect, in lieu of the Total Phenols Limitation specified in Section 29.111(b)(2), to substitute specific limitations for each of the eight (8) individual phenolic compounds identified under the Total Phenols Limitation. The following specific limitations, expressed in mg/l, shall be applied in lieu of the Total Phenols Limitation, upon election;

2-Chlorophenol.....2.0 mg/l
4-Chlorophenol.....2.0 mg/1
4-Chloro-3-methylphenol.....1.0 mg/l
2,4-Dichlorophenol.....5.5 mg/l
2,4-Dinitrophenol.....2.0 mg/l
4-Methylphenol.....5.0 mg/l
4-Nitrophenol.....15.0 mg/l
Phenol.....14.0 mg/l

Following election, the wastewater discharge permit shall be modified to incorporate these substituted parameters and an Industrial User shall be responsible for monitoring and reporting compliance with these parameters.

Appendix C. Interim Discharge Limitations

No user shall discharge wastewater containing any of the following pollutants in excess of the following interim pollutant discharge limitations:

(1) Compatible Pollutants:

Motion by Councilman Hartwell,
Seconded by Councilman Hennigan,

WHEREAS, a Special Approval Board application has been received from Sal Kosto requesting to use the property at 27400 John R for an auto repair and maintenance facility, said property is zoned B-3 General Business, and

WHEREAS, a public hearing was advertised in The Daily Tribune on September 25, 2009 and 231 notices were mailed to property owners within 500 feet of the aforementioned property; and

WHEREAS, a report has been received from the Community Development Department, stating that:

REQUEST: Special Approval for Motor Vehicle Light Repair (no collision repair) in the B-3 General Business District under Section 10.326(11).

STAFF ANALYSIS:

1. Special Approval is required for motor vehicle light repair in the B-3 District. The applicant is seeking approval to utilize the existing building (former Greenskeeper landscaping) for light motor vehicle repair, which excludes collision repair. Parking for vehicles awaiting service is proposed behind the building and is fully screened as required.

2. The same applicant previously applied for special approval for both motor vehicle light repair and exterior used car display area at the August 10, 2009 City Council meeting. Following public hearing, City Council denied the request (Minutes attached).

3. Shortly after the denial, the applicant submitted a substantively modified application for special approval which: eliminated exterior used car display; utilizes the entire existing building for interior only used vehicle sales and motor vehicle light repair; reduces the proposed parking lot; increases the proposed landscape area; and eliminates the access drive and curb-cut to Farnum St. This modified application eliminates the previous need for special approval for the used car sales, as only outside sales of used vehicles requires special approval. Indoor used vehicle sales are permitted by right in B-3.

4. Parking exceeds minimum ordinance requirements.

5. Hours of Operation: 9 a.m. – 6:00 p.m. Mon – Sat.

6. The Site Plan Review Committee has no additional site plan comments to address.

7. Should City Council grant special approval for this proposed use, the Site Plan Review Committee recommends the following conditions:

a. Repairs shall be limited to motor vehicle light repair only. No collision repair or bump and paint activities are permitted.

b. All vehicles waiting for repair shall be stored in the designated spaces behind the proposed screen gate east of the building.

c. Used car display limited to 13 vehicles inside the building only. No exterior display or parking of any vehicles for sale.

d. No exterior overnight parking of any vehicles on site except vehicles awaiting repair within the screened parking area south of the screen gate and east of the building.

NOW, THEREFORE, BE IT RESOLVED, that the Madison Heights City Council, acting as a Special Approval Board in accordance with Section 10.201.1 of the Code of Ordinances, hereby approves the request to permit the use of a motor vehicle light repair facility under Section 10.326(11) of the Zoning Ordinance in a B-3 General Business District at 27400 John R with the following conditions as recommended by the Site Plan Review Committee:

a. Repairs shall be limited to motor vehicle light repair only. No collision repair or bump and paint activities are permitted;

b. All vehicles waiting for repair shall be stored in the designated spaces behind the proposed screen gate east of the building;

c. Used car display limited to 13 vehicles inside the building only. No exterior display or parking of any vehicles for sale; and

d. No exterior overnight parking of any vehicles on site except vehicles awaiting repair within the screened parking area south of the screen gate and east of the building.

307. Meeting Open to the Public.

County Commissioner Gary McGillivray, 926 Tanglewood, indicated that the County passed the budget and $1.0 million for tri-party road funding for Oakland County Road Commission roads was included. Commissioner McGillivray cautioned residents on a solicitation he received for water supply line insurance.

Michelle Kotula, 1380 Elliott, stated that she was present on behalf of her mother to inquire if the City would be willing to install a second water

meter at her residence to help lower the cost of the water and sewer fees. City Manager Austin responded by stating that Ms. Kotula's request had been researched previously for the same cited reasons, and it was determined that the installation of the separate water meters was not cost effective for the water system and would not result in the lowering of the resident's water fees. City Manager Austin indicated he would provide documentation to Ms. Kotula and after she has reviewed the material, he would be willing to meet with her to discuss any questions.

ARTICLE II. LICENSES GENERALLY

Sec. 7-16. Licenses required, nontransferable between parties or locations; multiple businesses; sanctions for violation.

(A) Because any retail or service business, full-time, part-time, temporary, seasonal or otherwise, located within the city affects the physical and economic well-being of the city, this article is designed to provide a means for the city to promote, protect and safeguard the public health, safety and welfare of its citizens and to enable the city to keep accurate records of retail and service businesses within the city.

(B) No individual, partnership, company, firm, corporation, association, religious sect, society, organization, league, or other business entity shall engage, or be engaged, in the operation, conduct or carrying on of any retail or service business, full or part time, temporary, seasonal or otherwise, without first obtaining a license from the city in the manner provided for in this chapter. Sec. 7-18. Reserved.

Sec. 7-19. State license no exemption.

The fact that a license is required, or has been granted to any person or entity, by the State, County or any other regulatory agency to engage in the operation, conduct, maintenance or management of any business or premises shall not exempt such person from the necessity of obtaining a license from the city unless the business is specifically exempted elsewhere in this ordinance.

Sec. 7-20. Compliance with state and county licensing laws first.

services to be sold, offered for sale or otherwise provided by the applicant.

(4) A list of all assumed names under which applicant intends to do business.

(6) A signed approval and any required fees for a background check; and the application fee as provided in Section 7-24.

(B) When approvals from the Police and Treasurer's Departments have been received, the application shall be submitted by the city clerk to the city council for their consideration. When the clerk has received council approval, and approval from all other required departments and agencies, a license may be issued. The applicant shall not open the establishment to the public prior to the issuance of a business license.

(C) In the event that an initial application is denied by a Department based on grounds for denial contained in Sections 7-27 or 7-32, the clerk shall notify the applicant of the denial and advise the applicant of the right to appeal pursuant to Section 7-33.

Application forms for such licenses shall be made available by the city clerk. Subject to the terms and provisions of this article, all licenses shall be issued for a maximum of one year and shall expire at 11:59 P.M. on December 31st of the year issued, unless a different date or period of time is designated by city council, in which case the date will be listed as the expiration date of the business license by the city clerk. The application must contain a site plan for the proposed location. The site plan shall indicate building locations, parking areas, sidewalk areas, fences, landscaped areas, driveways and the specific areas outside of a building where proposed business activities are to be conducted. Applications will not be accepted that include activity dates that extend beyond a one (1) year period from the application date.

(C) The required fee for each license shall be paid in full at the time of the submission of an application. No rebate or refund shall be made of any license fee or part thereof by reason of the death of the licensee or by reason of denial of the application, nonuse of the license or discontinuance of the operation of the retail or service business establishment. In the event the retail or service business moves its place of operation from one location in the city to another location in the city, a new license and fee shall be required for the new location in accordance with the terms and provisions of this article.

The site plan shall indicate building locations, parking areas, sidewalk areas, fences, landscaped areas, driveways and the specific areas outside of a building where proposed business activities are to be conducted.

The Community Development Department and the Fire Department shall review and approve the site plan before the application is submitted to city council. The Departments may, at their discretion, require changes to the site plan and recommend that certain conditions or requirements be placed by city council on the grant of a license. In rendering a decision as to any condition or

requirement the departments and city council shall take into consideration the health, safety and welfare of the public, including, but not limited to, such factors as the nature and intensity of the business or activity and its affect on the surrounding neighborhood; the effect of the business or activity on pedestrians or vehicular traffic, such as interference with ingress and egress or whether the business or activity causes obstructions to the flow of traffic or creates any other hazard, and whether such business or activity is offensive or hazardous at the specific location on the premises.

(C) No license shall be issued prior to approval of the Fire Department, Police Department, Treasurer, Community Development Department and the county health officer, where applicable.

Sec. 7-24. Fees and exemptions.

(A) The city council shall establish business license fees by resolution. All fees shall be paid in full prior to the issuance of a license.

(B) No business license fee shall be required from any person exempt from payment of the fee by state or federal law. Such persons shall comply with all other provisions of this article. The city clerk shall, in all such cases, designate on the license the fee exemption and the reason therefore.

(C) City council may, upon written request, waive a business license fee if it is determined that the business being conducted is for a charitable, religious, civic, educational or philanthropic purpose.

Sec. 7-25. Record of all establishments kept by city clerk.

The city clerk shall cause to be maintained a record of all retail or service businesses established in the city for the purpose of classifying, servicing, inspecting and licensing such establishments.

Such evidence of license shall bear the signature of the city clerk.

Discharge and dismissal under this section shall be without adjudication of guilt and is not a conviction for purposes of this section or for purposes of disqualifications or disabilities imposed by law upon conviction of a crime, including the additional penalties imposed for second or subsequent convictions or juvenile adjudications under subsection (1)(b) and (c). There may be only 1 discharge and dismissal under this subsection as to an individual. The court shall maintain a nonpublic record of the matter while proceedings are deferred and the individual is on probation and if there is a discharge and dismissal under this subsection. The secretary of state shall retain a nonpublic record of a plea and of the discharge and dismissal under this subsection. These records shall be furnished to any of the following:

(a) To a court, prosecutor, city attorney, or police agency upon request for the purpose of determining if an individual has already utilized this subsection.

(b) To the department of corrections, a prosecutor, city attorney, or a law enforcement agency, upon the department's, a prosecutor's, city attorney, or a law enforcement agency's request, subject to all of the following conditions:

(i) At the time of the request, the individual is an employee of the department of corrections, the prosecutor, or the law enforcement agency, or an applicant for employment with the department of corrections, the prosecutor, or the law enforcement agency.

(ii) The record is used by the department of corrections, the prosecutor, or the law enforcement agency only to determine whether an employee has violated his or her conditions of employment or whether an applicant meets criteria for employment.

(4) The court may order the person convicted of violating subsection (1) to undergo screening and assessment by a person or agency as designated by the substance abuse coordinating agency as defined in section 6103 of the public health code, 1978 PA 368, MCL 333.6103, in order to determine whether the person is likely to benefit from rehabilitative services, including alcohol or drug education and alcohol or drug treatment programs. The court may order a person, subject to a conviction or placed on probation regarding a violation of subsection (1), to submit to a random or regular preliminary chemical breath analysis.

(5) The secretary of state shall suspend the operator's or chauffeur's license of an individual convicted of violating subsection (1) or (2) as provided in section 319 of the Michigan vehicle code, 1949 PA 300, MCL 257.319.

(6) A peace officer who has reasonable cause to believe a person under 21 has consumed alcoholic liquor or has any bodily alcohol content may request consent of the person to submit to a preliminary chemical breath analysis. If the person under 21 refuses the request of the peace officer to take the test, a test shall not be given without a court order. A peace officer may arrest a person based in whole or in part upon the results of a preliminary chemical breath analysis. The results of a preliminary chemical breath analysis or other acceptable blood alcohol test are admissible in a criminal prosecution to determine whether the person under 21 has consumed or possessed alcoholic liquor or had any bodily alcohol content.

(7) A law enforcement agency, upon determining that a person less than 18 years of age who is not emancipated under 1968 PA 293, MCL 722.1 to 722.6, allegedly consumed, possessed, purchased alcoholic liquor, attempted to consume, possess, or purchase alcoholic liquor, or had any bodily alcohol content in violation of subsection (1) shall notify the parent or parents, custodian, or guardian of the person as to the nature of the violation if the name of a parent, guardian, or custodian is reasonably ascertainable by the law enforcement agency. The notice required by this subsection shall be made not later than 48 hours after the law enforcement agency determines that the person who allegedly violated subsection (1) is less than 18 years of age and not emancipated under 1968 PA 293, MCL 722.1 to 722.6. The notice may be made by any means reasonably calculated to give prompt actual notice including, but not limited to, notice in person, by telephone, or by first-class mail. If an individual less than 17 years of age is incarcerated for violating subsection (1), his or her parents or legal guardian shall be notified immediately as provided in this subsection.

(8) This section does not prohibit a person under 21 from possessing alcoholic liquor during regular working hours and in the course of his or her

employment if employed by a person licensed by Michigan Liquor Control Code, 1998 PA 58, MCL 436.1101 et. seq., by the Michigan Liquor Control Commission, or by an agent of the Michigan Liquor Control Commission, if the alcoholic liquor is not possessed for his or her personal consumption.

(10) The consumption of alcoholic liquor by a person under 21 who is enrolled in a course offered by an accredited postsecondary educational institution in an academic building of the institution under the supervision of a faculty member is not prohibited by this ordinance if the purpose of the consumption is solely educational and is a requirement of the course.

(11) The consumption by a person under 21 of sacramental wine in connection with religious services at a church, synagogue, or temple is not prohibited by this ordinance.

(12) Subsection (1) does not apply to a person under 21 who participates in either or both of the following:

(a) An undercover operation in which the person under 21 purchases or receives alcoholic liquor under the direction of the person's employer and with the prior approval of the local prosecutor's office as part of an employer-sponsored internal enforcement action.

(b) An undercover operation in which the person under 21 purchases or receives alcoholic liquor under the direction of the state police, the Michigan Liquor Control Commission, or a local police agency as part of an enforcement action unless the initial or contemporaneous purchase or receipt of alcoholic liquor by the person under 21 was not under the direction of the state police, the Michigan Liquor Control Commission, or the local police agency and was not part of the undercover operation.

(13) The local police agency shall not recruit or attempt to recruit a person under 21 for participation in an undercover operation at the scene of a violation of subsection (1).

(14) In a criminal prosecution for the violation of subsection (1) concerning a person under 21 having any bodily alcohol content, it is an affirmative defense that the person under 21 consumed the alcoholic liquor in a venue or location where that consumption is legal.

(15) As used in this section, "any bodily alcohol content" means either of the following:

(a) An alcohol content of 0.02 grams or more per 100 milliliters of blood, per 210 liters of breath, or per 67 milliliters of urine.

380. SUBSTITUTE MOTION - Ordinance 1072 – Amendments to Animal Ordinance, Second Reading.

Motion by Councilman Geralds, seconded by Mayor Pro Tem Hartwell, to approve Ordinance 1072 Amendments to Animal Ordinance on the second and final reading with the removal of the vaccination and licensing requirements for domestic cats.

Police Chief Sagan responded to the domestic cat vaccination requirement by stating that although rabies cases in the cat population are rare, the vaccination is a preventative measure and it helps to ensure the health of the stray cat population, and recommended that the requirement be maintained in the Ordinance.

City Manager Austin indicated, and City Attorney Sherman confirmed, that while the rabies vaccination for domestic cats is not required by State statute, the Council can require more stringent requirements in the City's Ordinance.

Following Council's discussion, Councilman Geralds withdrew his motion and Mayor Pro Tem Hartwell concurred.

(9) As a part of the sentence for a violation of this section, the court may, as a condition of probation, order the defendant not to own or possess an animal for a period of time not to exceed the period of probation. In the event the police department receives a report as set out in section 5-37, the animal control officer or police department shall take such dog or cat into its possession and deliver it to the animal control shelter. Such dog or cat shall be held in quarantine for a ten-day period. The animal control officer shall promulgate and adopt such rules as he or she deems necessary for the procedure in all such cases and for the disposition of any dog or cat delivered into his or her custody. The animal control officer may, in limited circumstances, promulgate and adopt a procedure to allow for a home quarantine of a dog or cat, when in the opinion of the animal control officer, such home quarantine is warranted and would not pose a danger to the public health, safety and welfare. Each operator of a animal control officer shall be required to maintain a record on each identifiable dog or cat acquired, indicating a

This section does not apply to animals which are sick or injured to the extent that the holding period would cause undue suffering, or to animals whose owners request immediate disposal. The carcasses of dogs or cats destroyed at the animal control shelter or elsewhere shall be disposed of by the animal control officer, or other designated authority, in a manner approved by the health department.

If, in the animal control officer's judgment, said dog or cat is valuable or otherwise desirable for keeping, the animal control officer may dispose of said dog or cat to any person, shelter or animal rescue organization who will undertake to remove said dog or cat from the city and provide for the adoption of said dog or cat or keep and harbor said dog or cat within the city in accordance with the provision of this chapter.

3. A reduced proposal including: proposed gap reduction measures; split rate increase to address the cash shortfall; and the Fixed Network Water Meter Reading System, but excluding all Watermain Replacements (Proposal "R-2" and Non-R), Salt Dome Repairs, Sewer Vactor and Sewer Rehabilitation.

City Manager Austin and Director of Administrative Services Marsh provided the Council with a presentation overview of the FY 2010-11 Preliminary Proposed Budget. The City Manager started the meeting by commending the work of the Department Heads, and especially the work of the Director of Administrative Services Marsh, for an excellent job in creating proposals to address our financial challenge. Mr. Austin also thanked the City Council for their feedback in prioritizing the Gap Reduction Proposals.

City Manager Austin acknowledged that neither he, the Department Heads nor the City Council want to see programs and services reduced or fees increased. Despite our desire, we still have the responsibility to determine the priority needs of the community and to work together to balance those needs against available resources as we build a consensus Budget.

Ms. Marsh explained the budget process and indicated that the Proposed Budget will be provided to Council by the Charter's mandated third Monday in April, which is April 19, 2010, and that the City Council has until the third Monday in May, which is May 17, 2010 to approve a Budget. Ms. Marsh explained the General Fund, Fund Balance classifications and the use of Fund Balance to balance the FY 2010-11 Preliminary Proposed Budget.

Mr. Austin discussed the status of pending and settled labor agreements with the eight Union groups and their impact on next year's Budget. Mr. Austin indicated the FY 2010-11 Proposed Budget includes the elimination of 23 full-time positions and 6 part-time positions and a projected layoff of 6 full-time employees from the City's workforce.

Ms. Marsh summarized the Other Funds for the Council including Major Street, Local Street, Water and Sewer Fund and the Special Assessment Fund.

Mr. Austin reviewed in detail the Capital Outlay Summary indicating that 80% of the General Fund resources are programmed for the Fire Department.

Mr. Austin stated that following November's Long-Range Financial Forecast results, which projected a $4.0 million gap between the General Fund revenues and expenditures for FY 2010-11, staff has revised the projected gap from $4.0 to $3.2 million, based on updated projections. The revised $3.2 million gap projection was addressed by:

Increasing Revenues	$ 236,000	7.3%
Decreasing Expenditures	1,936,000	59.5%
Use of Fund Balance	1,081,000	33.2%
	$3,253,000	100.0%

Mr. Austin and Ms. Marsh reviewed the Gap Reduction Measures as related to General Fund Revenue (Table I); General Fund No or Minor Service Reductions (Table II); General Fund Policy-Related Service Reductions (Table III); Staffing Related Service Reductions (Table IV); and, Policy-Related Service Reductions (Table V).

Following the Budget presentation and Council's discussion, Council gave the following direction of changes for the Proposed Budget:

The City Manager started the meeting by commending the work of the Department Heads for creating the Gap Reduction Proposals and thanked the City Council for their feedback in prioritizing the Proposals.

City Manager Austin acknowledged that neither he, the Department Heads nor the City Council want to see programs and services reduced or fees increased.

City Manager Austin and Director of Administrative Services Marsh provided the Council with a brief overview presentation of the FY 2010-11 Proposed Budget, outlining the changes since the Preliminary Proposed Budget Council Workshop on March 6, 2010. A certificate of occupancy shall be issued when the work covered by a building permit has been completed in accordance with the permit, the code and other applicable laws and ordinances. On request of a holder of a building permit the City may issue a temporary certificate of use and occupancy for a building or structure, or part thereof, before the entire work covered by the building permit has been completed, if the parts of the building or structure to be covered by the certificate may be occupied before completion of all the work in accordance with the permit, the code and other applicable laws and ordinances, without endangering the health or safety of the occupants or users. When a building or

structure is entitled thereto, the City shall issue a certificate of use and occupancy within 5 business days after receipt of a written application on the prescribed form and payment of the fee to be established by City Council. The certificate of occupancy shall certify that the building or structure has been constructed in accordance with the building permit, the code and other applicable laws and ordinances. Certificates of occupancy shall be issued to the occupant. In a multi-tenant building each individual occupant shall obtain a certificate. A copy of the certificate of occupancy shall be conspicuously posted in public view on the premises used for any purpose other than residential.

(2) (a) *Expiration:* Certificates shall expire immediately upon any change in the use, ownership or occupancy of the structure, or a portion thereof.

(b) *Ownership changes:* Where only the ownership of a multi-tenant building changes the building owner shall be responsible for obtaining a new certificate for each tenant. The fee for each new tenant certificate shall be twenty percent (20%) of the regular fee.

(3) *Certificates including zoning.* Certificates of occupancy as required by the Building Code for new buildings or structures, or parts thereof, or for alterations to or changes of use of existing buildings or structures, shall also constitute certificates of occupancy as required by this Ordinance.

(4) *Certificates for existing buildings*. Certificates of occupancy will be issued for existing buildings, structures, or parts thereof, or existing uses of land, if, after inspection. it is found that such structures, buildings, or parts thereof, or such use of land are in conformity with the provisions of this Ordinance. It shall hereafter be unlawful for any person to occupy any existing commercial and/or industrial building or premises located within the City of Madison Heights which has been vacated by a tenant, lessee or owner, unless such person desiring to reoccupy such building or premises shall first make application for and obtain a certificate of occupancy from the Building Official.

(5) *Temporary certificates*. Nothing in this Ordinance shall prevent the City from issuing a temporary certificate of occupancy for a portion of a building or structure in process of erection or alteration, provided that such temporary certificate shall not be effective for a period of time in excess of ninety (90) days and may not be renewed more than once for a total of one hundred eighty (180) days provided that such portion of the building, structure or premises is in conformity with the provisions of all applicable ordinances. The applicant for a temporary certificate of occupancy shall, prior to the issuance of said temporary certificate, deposit with the City of Madison Heights the required fees and performance guarantees established by resolution of City Council."

Councilmember Geralds offered an amendment to the motion on the table, to allow plastic inserts in chain link fences provided that all adjacent neighbors agree and that any decaying inserts must be repaired. City Manager Austin suggested that if Council wished to change the amendment regarding plastic inserts for fencing, it would be a new proposal and suggested that they pass the Ordinance as is with the exception of that section and send it back to the Planning Commission for further evaluation.

Councilmember Geralds moved to amend to the motion, seconded by Councilmember Gettings, which approved the Ordinance Amendments as written, with the exception of Section 18 to be remanded to the Planning Commission.

314. Meeting Open to the Public.

Darlene Mentzer, 1564 Jenifer, requested that the City return the Fire Department to an eight man minimum. She added that there would be a fundraiser held for the two laid off firefighters. She informed the Council and public that tickets were available at the Fire Department.

Janice Geary, 30156 Northeastern, commented that she had brought an advertisement for the aforementioned fundraiser to City Hall to be posted and was told that the City Manager needed to approve it, but she didn't see it on the board. Ms. Geary also mentioned her support on the hen issue. She then noted that she saw an advertisement for the Youth Assistance fundraiser posted. She asked when the City was going to meet with the firefighters, and the Mayor informed her it was scheduled for the following morning (October 13, 2010) at 10:00 am, and clarified that it was mediation through an arbitrator. City Manager Austin explained that the meeting was scheduled with the Union for mediation for the following two days. Ms. Geary told the Mayor and Council that she felt the City needed to return to an eight man minimum and said that Station 2 had been shut down just the other day. City Manager Austin clarified that Station 2 had not been shut down. Ms. Geary returned to the issue of the flyer for the firefighter fundraiser and City Manager said if Council wished it to be posted that would be fine but he had concerns about the flyer including that the numbers listed were for the Fire Department and it's not a City event.

Doris Eagan, 308 Sonia questioned the City's ability to monitor hens if the ordinance is amended to allow them. City Manager Austin said that the ordinance change had been indefinitely postponed by Council. Councilmember Geralds asked if the City's Animal Control Officer who covers Hazel Park, has had to respond to hen calls. City Manager Austin replied that he didn't have detailed information on her calls in Hazel Park, but would get the information and pass it on to Council. City Attorney Sherman reiterated that the ordinance was not adopted at this time and was postponed indefinitely, and his office would be preparing a legal opinion for Council's review.

Sara Kuzma, 306 Royal Park Lane said that she had filed a Freedom of Information Act to find out how many hen complaints there had been in the last two or three years and there had been only eight other complaints during that span of time. She pointed out that there were only nine complaints when hens were not even allowed, and added that since this issue became public she has had other residents tell her that they are raising hens without the City's knowledge. She commented that the noise from leafblowers, snowblowers, ice cream trucks etc. were disturbing to her peace and quiet and were more disturbing than hens.

Darlene Mentzer, 1564 Jenifer asked why Council couldn't adopt Ms. Kuzma's plan to monitor the hens since Ms. Kuzma appeared to be doing it the right way. Mayor Swanson said that if the ordinance were passed there would be regulations in place to monitor the hens. Ms. Mentzer commented that in regard to Animal Control she believed the City's Animal Control Officer was very good at her job and always keeps on top of things.

313. Minutes.

Motion by Councilmember Clark, seconded by Councilmember Corbett to adopt the minutes of the Regular Meeting held on, September 27, 2010 as printed.

314. Mayor and Council - Comments and Requests.

Councilman Corbett offered his congratulations to Judge Goedert on his appointment. He then spoke about People's State Bank and the problems they had been having of late. He noted that residents had approached him with concern that the City had money in that bank. He explained that the City had been aware of issues with the bank for some time, and

in an effort to support the bank but still protect the City's interests, the City took out much of its money and kept the rest as federal bank bonds. He pointed out that in this manner the City could support the local bank without risking harm to the taxpayers of Madison Heights. After some time the City determined that the circumstances had changed and recently the City received notice that the bank was informed they needed to merge or sell their stock. He emphasized that at this point no taxpayer money is in danger and the City has already taken all of its funds and placed them with other banking institutions. He praised the City administration and the Mayor for their handling of the situation in order to protect the City and the taxpayers. Councilmember Corbett announced that the City would be holding a public meeting on Monday October 18th at 7:00 pm where the Financial Forecast would be discussed. He cautioned that the City's finances were not any better and the budget process would be easy in the sense that the answer was "no". He said that a number of things that have been said in the last few months and the anger regarding the City's decisions would be addressed. He further commented that the residents have been asking the City to make decisions based on priority and he warned that the time has come that services would have to change because the City simply does not have the resources to continue in the same manner. He mentioned real estate values, pensions and health benefits which all affect the City's financing.

Mayor Pro Tem Hartwell asked how long the leaf and brush pick up would continue this season. City Manager Austin replied that leaf pickup typically continues through the week of December 1st or until the first snow, and brush chipping was available on an appointment basis. Councilmember Hartwell then invited the public to provide him and the rest of City Council with budget reduction ideas.

Councilman Clark complimented Andy Wakeland and his energy saving presentation on September 22nd, and wished that more people had attended because saving energy is one way people can help themselves during these challenging times. He then referred to the letter Councilwoman Scott read at the previous Council Meeting regarding the laid off firefighter, and added that while he is very sympathetic to those firefighters, at least they have a chance of being called back as opposed to other residents and even other City employees who will not be called back. He concluded by saying that Council does not like to have to make cuts or lay people off but the financial circumstances have forced the Council and the City to do so.

Councilwoman Scott announced that the National League of Cities has a prescription drug discount program and requested that the City research the program. She then announced three events: first the Heritage Rooms

located at 27107 Hales, will be open on election day Tuesday, November 2nd until 8:00 p.m. There will also be a special event with a rotating exhibit dedicated to Larry Decker at 6:30 p.m. Second, the fundraiser for the laid off Madison Heights firefighters will be held at Augie's on Thursday, November 4th from 5:00 p.m. to 9:00 p.m. and tickets are $10, available at the Fire Department or at the door. The last event she announced is the Madison Heights Youth Assistance spaghetti dinner fundraiser to be held on Friday, November 12th at from 5:00 p.m. to 7:00 p.m. at United Methodist Church, located at 246 East 11 Mile Road. Tickets are available at the door or by calling Youth Assistance at City Hall.

Councilman Gettings asked residents who have an opinion regarding the hen issue to call him or email him to let him know how they feel. He added that he has banked at Peoples State Bank for 35 years, and the staff has always been fantastic and he wished them the best. Lastly, Councilman Gettings noted that he too attended the energy savings seminar and informed the audience that by purchasing a water efficient toilet, shower head and sink faucet and he cut his water bill nearly in half.

Mayor Swanson announced that AT & T has a lifeline program which gives low income residents and seniors discounts on their landline telephones or wireless telephones. The information is available online or flyers will be provided at City Hall.

Special Meeting
Madison Heights City Council
Madison Heights, Michigan
October 18, 2010

A Special Meeting of the Madison Heights City Council was held on Monday, October 18, 2010, at 7:00 p.m. in the Municipal Building at 300 West Thirteen Mile Road, Madison Heights, Michigan.

Present: Mayor Swanson, Mayor Pro Tem Hartwell, Councilmembers Clark, Corbett, Geralds, Gettings and Scott. City Manager Austin and City Clerk Haley.

Absent: None.

Also Present: Deputy City Manager Benjamin Myers and Director of Administrative Services Melissa Marsh.

316. 2010 Long-Range Financial Outlook Presentation.

City Manager Austin, Deputy City Manager Myers and Director of Administrative Services Marsh presented for Council the 2010 Long-Range Financial Outlook Presentation. The presentation addressed three major questions:

1. Where is Madison Heights today?
2. Have our decisions been successful in keeping revenues and expenditures in-line?
3. What do we predict for the future of Madison Heights?
4. What can we do to keep Madison Heights successful?

Following the presentation Councilmembers directed questions to the staff:

Councilman Corbett inquired about the source(s) used to estimate the projected decline in property tax revenues for 2012, 2013 and 2014. City Manager Austin responded by stating that the County Equalization Department has the best and broadest knowledge relating to revenues and was used as the City's source of information related to the decline in property tax values.

Mayor Pro Tem Hartwell asked that staff research the possibility of expanding the Downtown Development Authority to include the entire City. City Manager Austin explained that staff would gladly provide

information on this request, but this would not provide significant new money to the General Fund to reduce the projected budget shortfall since that funding would be transferred between the funds allowed with the cost.

Councilman Geralds stated that he is not in favor of increasing taxes and desired Madison Heights to be in line with other cities comparables. Councilman Geralds also expressed concerns regarding the deficit projected in the Water and Sewer Fund for 2013 and 2014. City Manager Austin indicated that the Water and Sewer Fund fund balance does not reflect the monies still owed to the General Fund as a result of the 2010 $500,000 loan and does not assume any water and sewer rate increase, but includes projected Detroit Water and Sewerage Department and Oakland County Water Resource Commission rate increases for years 2011 and 2012. City Manager Austin stated that one mill provides approximately $40 in City revenue per year per homeowner. Furthermore, he stated that because residents are experiencing a decline in property values and taxes, they could realize savings even if Council levied additional millage in 2011.

Councilman Clark stated that he would not consider additional millage until Council has determined what cutbacks would be implemented for 2011.

Councilwoman Scott stated she would not vote for personnel reductions in the Fire or Police Departments. Councilwoman Scott indicated she is in favor of establishing a Library Board and would seek approval from the voters before levying a millage. Councilwoman Scott asked that the City Manager utilize the Library's staff for suggestions and recommendations concerning future plans for the Library. Councilwoman Scott suggested that the Michigan Municipal League be consulted as a possible resource regarding cutbacks or millage proposal suggestions for the Library. In closing, Councilwoman Scott suggested that Council may want to explore an income tax as a possible source of City revenue.

Councilman Gettings asked for residents' input regarding revenue sources or expenditure reductions and asked that they contact either a Councilmember or the City Manager's Office with their suggestions.

Councilman Corbett requested that prior to his supporting a millage proposal before the voters, he would like staff to seek alternative property value projections and report back to Council.

317. Authorization for Staff to Research Millage Options.

Motion by Councilman Corbett, seconded by Councilman Gettings, to authorize staff to research millage proposal options including but not limited to, a Library millage, a Headlee Override millage and a Public Safety millage and to report back to Council, based on the 2011 election schedule for February, May, August and November ballot language deadlines.

Present: Mayor Swanson, Mayor Pro Tem Hartwell, Councilmembers Clark, Corbett, Geralds, Gettings and Scott. City Manager Austin, Director of Administrative Services Marsh and City Clerk Haley.

Absent: None.

Also Present: MIS Administrator Fiscus, Human Resources Director Misczak, Deputy City Manager Myers, Police Chief Roberts, Community Development Director Schafer, Fire Chief Scheid, Library Director Yerman and Assistant City Attorney Sherman.

73. Presentation and Review of FY 2011-12 Preliminary Proposed Budget.

Mayor Swanson welcomed everyone to the Special Council Meeting to review the FY 2011-12 Preliminary Proposed Budget.

City Manager Austin and Director of Administrative Services Marsh provided the Council with a presentation overview of the FY 2011-12 Preliminary Proposed Budget. The City Manager started the meeting by commending the work of the Department Heads for an excellent job in creating proposals to address our continuing financial challenge. Mr. Austin also thanked the City Council for their feedback in prioritizing the Gap Reduction Proposals.

City Manager Austin acknowledged that neither he, the Department Heads nor the City Council want to see programs and services reduced or fees increased. Despite our desire, we still have the responsibility to determine the priority needs of the community and to work together to balance those needs against available resources as we build a consensus Budget.

Staff provided an updated status of City's financial forecast since the October 2010 Council Meeting stating that the projected $2.9 million gap

between the General Fund revenues and expenditures for FY 2011-12 has been revised to a $4.9 million gap. Staff stated that the Proposed Budget will be provided to Council by the Charter's mandated third Monday in April, April 18, 2011, and that the City Council has until the third Monday in May, May 16, 2011 to approve a Budget.

Next, Mr. Austin and Ms. Marsh reviewed the proposed General Fund millage rates and then continued with the Capital Outlay Summary; the May ballot issues; full-time and part-time positions; labor negotiations; and, the strategy of using a two-part plan to restore the Fund Balance used to balance this year's budget.

Mr. Austin stated that the revised $4.9 million gap projection, which increased from $2.9 in October of 2010, was addressed in the Preliminary Proposed Budget by:

Increasing Revenues	$ 1,101,000	22.4%
Decreasing Expenditures	1,438,000	29.3%
Use of Fund Balance	2,375,000	48.3%
	$4,914,000	100.0%

Mr. Austin further stated that although we would prefer to not use reserves to fund ongoing expenditures in this way, the use of fund balance will allow the City to avoid further service reductions and preserve basic services.

Mr. Austin continued the presentation, with the assistance from the Department Heads, reviewing the Other Funds; Major and Local Street Funds; and, the Water and Sewer Fund and addressed Council's questions.

Mayor Swanson granted a ten (10) minute recess.

The meeting reconvened at 10:45 p.m.

Mr. Austin reviewed the Gap Reduction Measures as related to General Fund Revenue; General Fund No or Minor Service Reductions; General Fund Policy-Related Service Reductions; and, Staffing Related Service Reductions.

Following the Budget presentation and Council's discussion, Council gave the following direction of changes for the FY 2011-12 Proposed Budget:

Changes to the Preliminary Proposed Budget:

$	(1,865)	Add Council Training–Related Housing and Mileage Reimbursement (Gap 602AR) for the next two fiscal years
$	26,250	Eliminate Standard Charge to Residents for EMS Transport (Gap 64R)
$	2,400	Eliminate Building Rental Fees for Madison Heights Youth Assistance and the Madison Heights Community Family Coalition at City Hall (Gap 36)

Mr. Austin asked for direction from Council regarding the Madison Heights Little Baseball's waiver of water and sewerage fees, which was approved at the January 25, 2010 Regular City Council Meeting, and indicated that unless he was directed otherwise by Council, the waiver would be continued in the FY 2011-12 Proposed Budget and beyond.

Mr. Austin proposed, and following Council's discussion, Council concurred to hold the FY 2011-12 Proposed Budget Council Meeting approximately two weeks prior to the May election on Monday, April 18, 2011.

74. Meeting Open to the Public.
